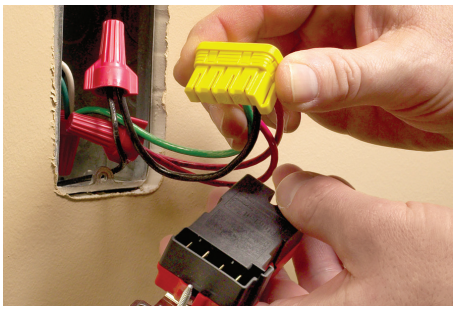
PlugTail® Receptacle & Switch Connectors

Connect with the product line that keeps growing



For accurate, faster jobs that require significantly less labor, choose from a wide variety of PlugTail Connectors designed specifically to work with our PlugTail line of receptacles, switches, and sensors. With an array of lengths and connector types that cover a multitude of on-site and prefab needs, experience the ease and efficiency of using PlugTail devices on your next project, like so many successful installations before you. Color options and push-in connectors help you finish projects in record time.

Feature & Benefits:

- Large crimped and welded brass contacts snugly terminate on device blade terminals.
- Ultrasonically welded polycarbonate connector housing secures terminations and conductors in a UL Listed, finger-safe housing.
- Audible snapping latch assures connection, allows release.
- Exclusive patented feature, circuit label on back allows permanent circuit identification.
- Pre-stripped connector leads fasten to conductors, easier than standard pigtails.
- Boost productivity even more with special add-ons: 4-port push-in connectors, fork terminal on ground wire, colored connector heads and longer-length pigtail solutions.
- No exposed terminals create a finger-safe application before, during, and after installation.
- Right-angle connectors fit flush with device back to leave more room in box
- Switch connectors offer 3-wire solution for single pole, 4-wire solutions for 3-way applications.
- WAGO push-in connectors are available to further speed up installation.
