Lantegra™ Solutions

Network Confidence

Entrust your network to the experts.

Just as SMP Data Communications and Hitachi Cable Manchester are already known in the industry for delivering "no hype" product quality and performance, the cabling alliance formed between the two companies is also born of the same "no hype" engineering integrity. We call this partnership Lantegra.

All Lantegra solutions are constructed from premium SMP connecting hardware and high performance HCM cable, including the Lantegra 10 Gig Solution, the newest generation in the Lantegra family. Designed to provide the ultimate in throughput, the Lantegra 10 Gig Solution delivers the best Link and Channel performance available. It is this dedication to consistent engineering excellence that ensures each installed system will deliver unsurpassed transmission bandwidth and robust applications support.

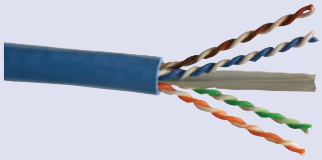
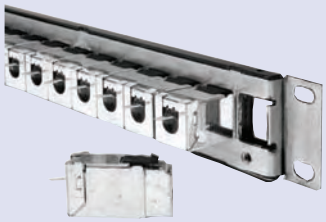
HCM Hitachi Cable Manchester

Lantegra™ 10G UTP Solution:

The engineering groups at SMP Data Communications and Hitachi Cable Manchester developed each of their cable and connectivity components separately to ensure component level compliance. However, they brought them together to create the Lantegra™ 10 Gig UTP Solution. SMP's Category 6a UTP connectors surpass IEEE throughput and elevated frequency response requirements and HCM's Supra 10G delivers outstanding individual cable and cable to cable alien crosstalk performance. When these components are mated together, they offer the best Link and Channel performance available.



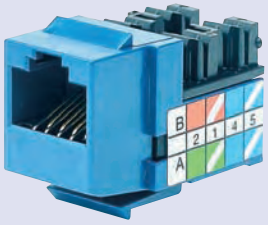


Lantegra™ 10G FTP Solution:

For those end users who intend to operate 10 Gigabit Ethernet to the desktop but also want the security and reliability of a shielded solution, there is the Lantegra™ 10G FTP Solution. This shielded solution is not only 10 Gig component-compliant, but also prohibits RFI and EMI and eliminates all alien crosstalk concerns. In addition to unsurpassed performance due to an overall aluminum foil, the newly released Slimline Category 6a shielded jack offers high-density alien crosstalk and EMI mitigation with 24 ports in a single rack space.

Lantegra™ 10G Fiber Solution:

Using HCM's 50 micron fiber optic cable and SMP Data Communications FiberOpticx connectivity the Lantegra 10G Fiber solution easily delivers unsurpassed transmission bandwidth and robust applications support. Providing 10 Gigabit Ethernet support up to 300 meters, Stratusclear, when mated to SMP's FiberOpticx connectivity, offers an ideal solution for end users who seek higher data rates and anticipate facility longevity. With a full array of discreet and plug-and-play products for the Backbone, Fiber to the Desk and Data Center network segments, the Lantegra 10G Fiber Solution ensures superior system performance.



Lantegra™ Cat 6+ Solution:

There are no smoke and mirrors in this solution. While other partnerships tout tuning between cable and connectors, Superior Modular Products and Hitachi Cable Manchester both manufacture to the component specifications. The result is the highest quality products in the business yielding the highest quality systems. This solution also offers a contact protection feature to enhance your Power over Ethernet solution.
