AXESS ELITE+

Unleash the Power of Control

Elevate power management with Axess ELITE+—advanced surge protection, IP outlet control and monitoring and seamless remote management. Reliable, safe, and built to PROTECT + CONNECT!

The Axess ELITE+ redefines power filtration and management, delivering best-in-class performance and reliability. Designed with IP outlet control, monitoring and non-sacrificial Advanced Series Mode surge protection, it safeguards critical systems while offering intelligent features like in-rush current elimination and advanced sequencing and triggers such as scheduling. Whether you're managing a single setup or linking up to 16 units, the Axess Elite+ ensures precise, seamless control from one intuitive web interface.

Equipped with 9 NEMA or 11 IEC individually switchable outlets—including a convenient front service outlet—the Axess ELITE+ is tailored for versatility. A swappable locking power cord, external temperature and humidity sensors, and a locking on/off switch enhance safety and customization. Remote power cycling, sequencing, and threshold-triggered events provide unparalleled convenience and peace of mind.

Built for the modern world, the Axess ELITE+ integrates effortlessly with third-party control systems and SurgeX CONNECT, giving you the ability to manage power anytime, anywhere. From advanced scheduling to remote analytics, this solution empowers you to optimize performance and maintain complete oversight of your power systems.

Elevate your operations with Axess ELITE+—the ultimate in power management.

Features:

- **Advanced Series Mode®**: Non-sacrificial surge protection for reliable performance
- **IP-Controlled:** Convenient remote monitoring and management
- **Advanced Remote Management:**
  - Turn outlets on/off, cycle power, and sequence devices
  - Support for advanced scheduling, AutoPing, and threshold-triggered events
  - Access detailed remote power management and analytics for each outlet
- **In-Rush Current Elimination:** Protects sensitive equipment on the first and second outlets
- **Scalable Control:** Link up to 16 units and manage them from a single interface
- **Swappable Power Cord with Lock:** Easy customization with secure connection
- **External Temperature and Humidity Sensor:** Real-time environmental monitoring
- **Locking On/Off Switch:** Added safety to prevent accidental operation
- **Third-Party Integration:** Seamless compatibility with control systems and SurgeX CONNECT
- Includes a lifetime warranty along with $50k protected equipment warranty
