Wireless Outdoor Protection

When it comes to outdoor protection, our sensors go to extremes!

Complete Protection Begins Outdoors

Although you rely on your security system to protect your property and the possessions inside your home or business, you may be overlooking a critical part of the solution…the outside. Knowing what's going on around the exterior will raise awareness to protect outdoor valuables and safeguard particular areas.

Resideo offers robust outdoor wireless solutions that are virtually weatherproof and water-resistant to perform in extreme temperatures. These devices can be monitored 24/7 by a central station to summon the authorities to a premises when necessary.

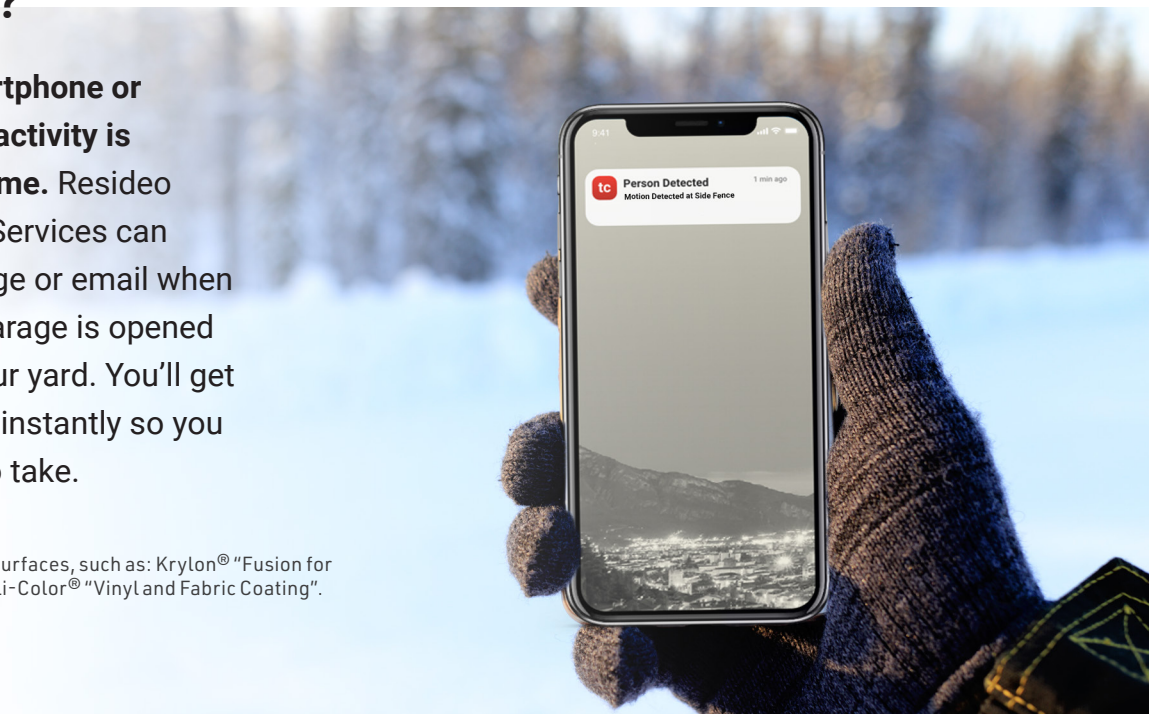
5816OD Outdoor Wireless Contact

The 5816OD is ideal for monitoring gates, sheds, detached garages or any other outdoor area with an exit/entry point. With its dark gray cover, the sensor blends well with most outdoor surroundings.

- Can take on harsh weather conditions and withstand temperatures as low as -40 °F (-40 °C) and as high as 150 °F (66 °C)
- Easy-to-replace, long-life AA lithium batteries
- Custom paintable* to match and blend in with any surface

Want to Be Aware When You're Not There?

Get notified on your smartphone or compatible device when activity is detected outside your home. Resideo Total Connect® Remote Services can notify you via text message or email when your shed door, gate or garage is opened or if there is activity in your yard. You'll get the information you need instantly so you can decide what action to take.

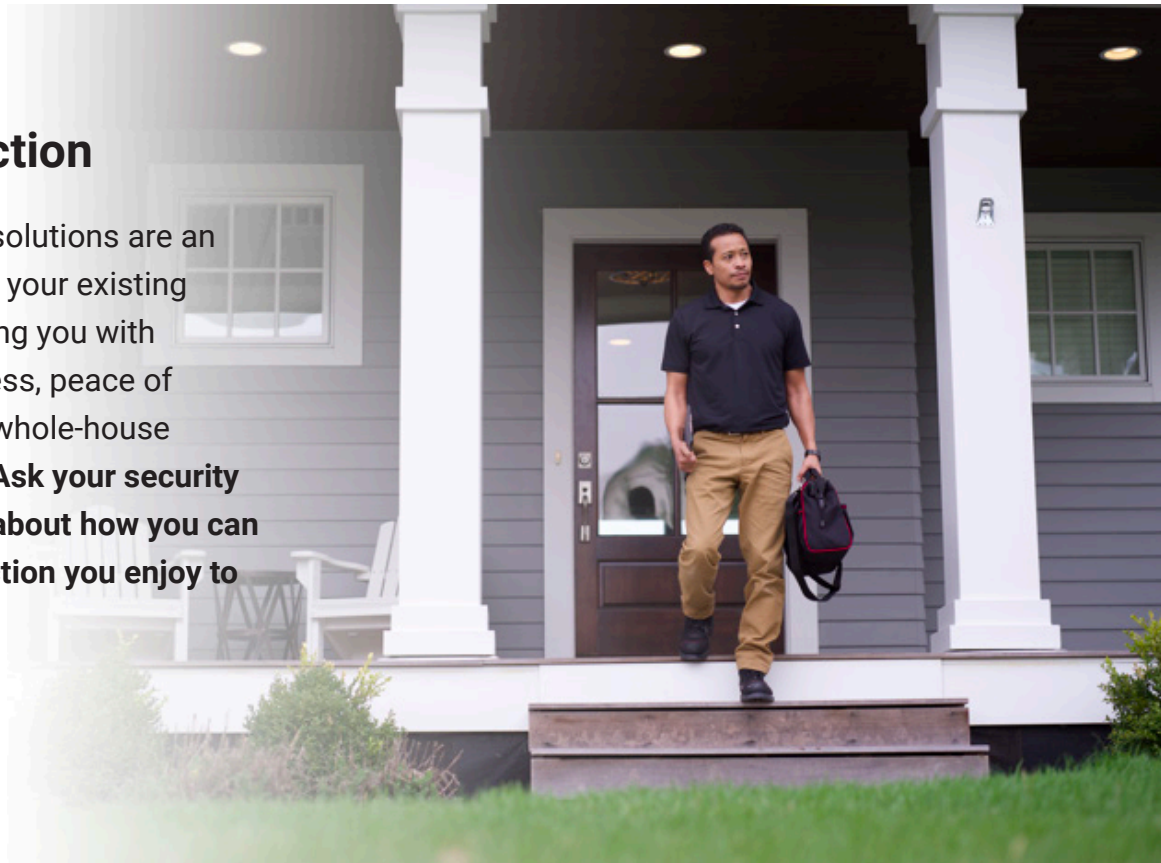


*Use specific paint designed for plastic surfaces, such as: Krylon® "Fusion for Plastic", Rust-Oleum® "Plastic" or Dupli-Color® "Vinyl and Fabric Coating".

5800PIR-OD2 Outdoor Wireless Motion Detector

The 5800PIR-OD2 can alert you when movement is detected in locations like driveways, detached garages, sheds, patios, pool areas, rooftops and car lots to protect outdoor valuables and areas such as: trailers, barbecues, lawn equipment, cars, boats, pools, cellular sites and much more. Also provides immunity to false alarm sources like pets, small animals, and bright lights from head lamps, sunlight and other light sources.

- Can take on harsh weather conditions and withstand temperatures as low as -40 °F (-40 °C) and as high as 140 °F (60 °C)
- Range adjustable up to 40 ft (12 m) with a 90° adjustable pattern
- Versatile mounting for wall or fence postAdjustable range up to 40 feet (12 m)



Complete Protection

These wireless outdoor solutions are an excellent complement to your existing security system—providing you with a higher level of awareness, peace of mind and the complete, whole-house protection you deserve. **Ask your security professional for details about how you can extend the indoor protection you enjoy to the outdoors today!**
