Product Selection Guide

Smart access control and video intercom systems

Security made simple.

With 40 years of experience in designing and manufacturing market-leading access control security solutions, we are passionate about technology.

We harness the latest available technologies to deliver elegant, useful and practical solutions for our customers. We are constantly striving to make our products simple to buy, install, and use.

We are a manufacturer committed to offering free training and ongoing support to our installers, all backed by our 5-year warranty for peace of mind.

Easy to quote

- Build your system one door at a time
- A range of products to suit any site requirement
- Scalable system – add doors when the budget is available

Easy to install

- Plug and play solutions that connect directly to the network
- Mix and match Net2 products – they are all designed to work together seamlessly
- Clear instructions and color coded wiring labels

Easy to work with

- Industry-leading customer support
- 5-year warranty and three step returns policy
- Free software upgrades and no multiple license fees

5 Networked Access Control

Our networked access control system, Net2, is administered using one or more PCs and can be monitored and managed from a central location. Our door controllers come as IP, wireless or battery powered.

48 Additional Information

Welcome

This Product Selection Guide is designed to help you to choose the right products to build up an access control system.

Paxton produce a variety of security solutions to suit different site requirements. Our one door philosophy means doors can be added as required or when budget becomes available.

What's new?

Paxton10 Security Enhancements

Paxton10

Providing a safer, simpler, more secure solution for your customers; with three new integral features:

- Instantly secure the premises in the event of an emergency with **Lockdown**.
- Real-time **email notifications** of alarms, access attempts, lockdown and more.
- Enhanced protection against cloning attempts with **encrypted credentials**.

See pages 21-27.

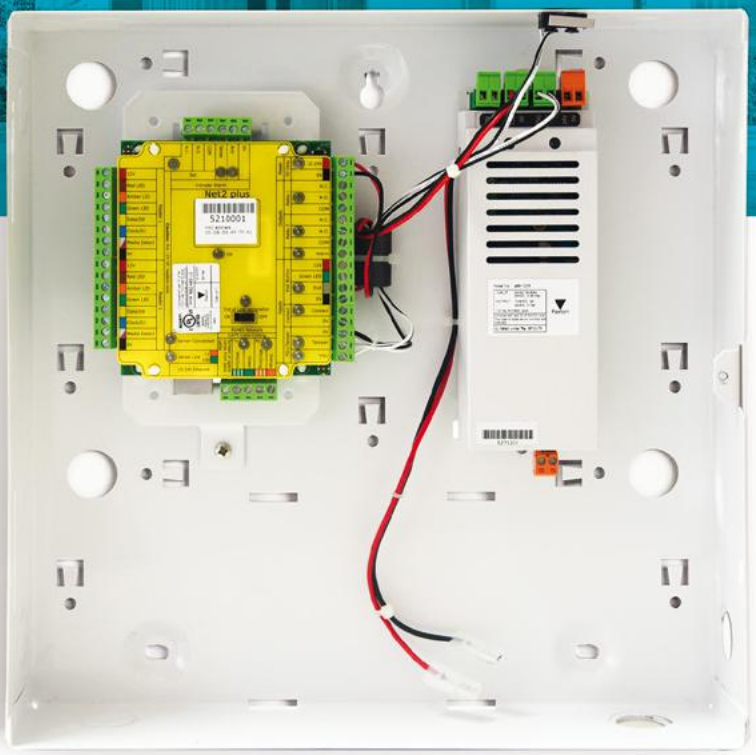
Networked Access Control



Our networked access control system, Net2, is administered using one or more PCs and can be monitored and managed from a central location. Our door controllers come as IP, wireless or battery powered.

- Net2 is Paxton's flagship access control product
- A powerful networked system that addresses the needs of the mid-market
- Modular approach for simplicity and scalability
- Simple intuitive software
- Range of features that move beyond basic access control
- A complete solution that encompasses wireless and door entry

Networked Access Control

Net2 plus
Wired Controller

- A networked IP ready single door controller
- On-board TCP/IP connection allows direct connection to a network
- Can connect together with dedicated RS485 network

Building Control - I/O Board

When a valid fob is presented to the reader, the I/O board can be programmed to trigger the power to elevators, lighting, heating and electrical equipment.

The Net2 I/O board is a simple, yet powerful addition to the Net2 system. It can be wired alongside a Net2 door controller, to switch power on and off to electrical equipment to save money and energy. The Net2 I/O board can control power to elevators, lighting, heating, water and air-conditioning by using the Triggers and Actions application in the Net2 software. These actions can be programmed for a particular time, or in response to a specific Net2 event.

- Connect directly to a LAN/WAN only
- Enable integration with elevators, lighting, heating and more
- 4 inputs and 4 outputs on the Net2 I/O board

Please note, Net2 I/O boards work as part of the Net2 system. They are not door controllers.

Notes

Access Control and Video Management

Paxton10 is a single platform solution combining access control and video management. Scalable from 1 to 1000 doors, and 1 to 1000 cameras, Paxton10 is a versatile solution suitable for all building types and sizes.

- Easy to quote and configure, build a complete system with just five components
- Manage multiple sites on a single system from anywhere with an internet connection
- Web-based user interface with no configuration required
- Paxton10 PRO and CORE cameras give you flexibility and choice
- Custom dashboards to suit any user requirements
- Built in **Bluetooth®** to use smartwatch or smartphone credentials.
- Works seemlessly with Entry and PaxLock Pro

Paxton10

Access control. Video management. One system

- Single door controller architecture for ease of install and flexibility
- Feature rich video management solution embedded in the cameras, no third-party integration required
- Built-in Bluetooth® wireless technology, supports free of charge smartphone credentials
- Fully compatible with Entry, our award-winning video and audio door entry solution
- Fully compatible with PaxLock Pro, our wireless lockset line
- Distributed intelligence to increase reliability
- Powerful multiformat readers and keypad, reads Paxton, MIFARE®, HID™ Prox, EM, FeliCa, NFC and DESFire token technology

Paxton Connect

Paxton Key App

Paxton10 Software

A web-based user interface that is intuitive and easy to use.

Accessible from any device with an internet connection, the interface makes remote site management simple. The software comes as a native part of the system with a Paxton10 server. It has a range of intelligent features to maximize efficiency and optimize the combined access and video management solution.

- Free of charge – simple online updates with no ongoing license fees
- Suitable for touchscreen and desktop devices
- Optimised for use on PCs and tablets
- Flexible and secure remote access
- Email notifications of system events

Features:

Dashboards - Customized dashboards to suit any user requirements

Reports - Powerful reporting engine where all system events and videos can be reviewed

Site plans - For the visual management of the system

Tutorial wizards - Support new and existing users to make full use of the software

People - Manage user permissions, credentials and information

Rules - Set permissions, time profiles, triggers and actions and much more

Devices - Configure and manage the devices in a building

Lockdown - Instantly secure the premises in the event of an emergency

Paxton10 Apps

Paxton Connect

Flexible site management

The Paxton Connect app provides easy and flexible site management for Paxton10. Containing easy to use features in one smart user interface, Paxton Connect enables you and your customers to manage multiple sites remotely from a smartphone.

Features:

People - Manage user permission, credentials and information

Reports - Access all system reports from your smart device or tablet

Devices - Configure and manage all devices on site

Dashboards - Access custom dashboards for personalized system overview

Paxton Key

Utilize smart devices as access tokens

The Paxton Key app allows system users to make use of their smartphone or smartwatch in place of traditional tokens. These are called smartphone credentials and can be issued free of charge. Utilizing the built-in Bluetooth® wireless technology in Paxton10 readers, the smart device can securely communicate with the Paxton10 system to grant or deny access. Paxton Key also enables the user to carry out predefined building management functionality – such as setting the intruder alarm.

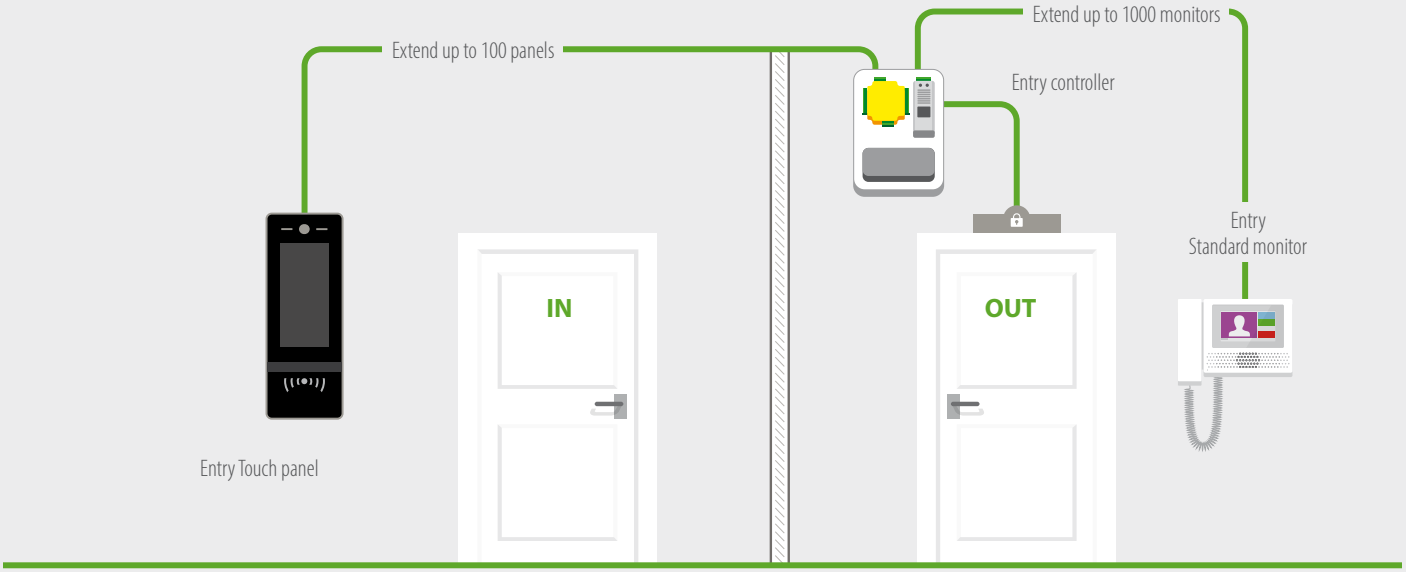
Video Intercom

Entry is a video intercom system that works standalone or alongside Net2 access control, combining door entry with key features of Net2.

Entry is a scalable solution, allowing expansion of up to a hundred panels and a thousand monitors.

- Just 3 components - monitor, panel and door controller
- Premium, standard, audio, and vandal resistant solutions available
- Intruder alarm integration - set the alarm in Net2 from the Entry panel for extra convenience
- Pan/tilt camera functionality to capture an angled view
- Low light sensitivity camera - ideal for use day or night
- SIP compatibility - the door can be answered from cell phone, tablet or PC
- Add a secondary IP camera for higher security sites



Entry

A smart, simple video intercom system.

- Panels available in three variants: the Entry Touch panel with an advanced 7-inch color touch screen, Entry Standard panel in anthracite grey and the Entry VR panel in super durable stainless steel
- All variants available in flush, surface and rain-hood versions - suitable for a range of environments
- Three monitors available, including premium, standard and audio, to create a custom solution for any site
- Personalize the Entry Touch panel, premium monitor and Standard monitor with multiple theme options and contact images for quick visual recognition
- Video voicemail, enables visitors to leave a video message
- Add a secondary IP camera for higher security sites
- Reads Paxton and MIFARE® token technology

Standalone Access Control

Standalone access control is the simplest way to secure and control access through doors around your building. If you're looking to step up security, protect your staff and assets and save money, then Standalone access control is for you.

- A non-networked access control solution
- Simple and unique card management system
- Internal (Compact)/external (Switch2)
- Suitable for small to medium sized premises, or any site looking to secure a small number of doors
- Entry and PaxLock Pro now work in standalone mode

Switch2

Switch2 is a standalone system that comes as a separate single door controller and reader. The door controller is fitted on the secure side of the door, with the reader fitted on the other side. Switch2 offers a secure solution for customers wishing to control door access, who do not need the reports on users' movements provided by a PC based access control system.

Entry

Our video intercom system works in standalone mode for a quick, simple installation and easy user management with our standard enrolment and shadow cards. Offer a flexible system that can grow in line with your customers' requirements and be upgraded to work with Net2 or Paxton10, with no hidden costs.

See page 33 for more information

PaxLock Pro

PaxLock Pro is our wireless access control solution in a battery operated door handle. It can be installed in standalone mode for use on sites not requiring the additional functionality of an online system. It's flexible upgrade path from standalone to networked creates a solution which can evolve with the needs of your customer.

See page 35 for more information

Switch2 Readers

These readers are for use with Switch2. Designed to fit in seamlessly in any environment, our wide range means you get the right choice for your site requirements.
