

# Manage

Advanced workplace management software

## Overview

### **The smarter workspace management platform**

Make your working environment smarter and more productive with Manage – our workplace management platform. The systems give AV/IT, facilities and communications managers full control over devices, signage and content across the whole workplace ecosystem, from meeting rooms to reception areas. And, as your needs evolve, you can add further solutions with ease, including Book, Reception or Mobile.

The result is simple yet systematic working, tighter team collaboration and intuitive management tools for all your facility and resource needs.

Manage gives organisations the power to transform their workplace so that device management is streamlined, usage of space is optimised, energy costs are reduced, communication is targeted, and worker productivity is amplified.

## Features

### **Full control of devices**

With a sleek interface for intuitive user experience, Manage allows you to control networked devices, view device status and live signage content. Group devices by location and easily add new devices with the auto-discover function.

### **Schedule devices and content playout**

Ensure that the right content is displayed on the right screen, at the right time by scheduling signage content to your devices. Schedule on/off times for devices to save energy when devices are not in use.

### **A total view on workplace data**

Collect data and view advanced analytics in a dashboard-style interface. Filter content and use insights to drive smarter decision making all within a secure space.

### **Rapidly pinpoint issues and send emergency alarms**

Receive alerts when a device is not working correctly and proactively fix issues in advance. Push urgent alarm notifications to connected devices such as fire emergency directions.

### **Scalable and cost effective**

Cloud or on-site local deployment and wide device compatibility allows for simple installation and maintenance with remote configuration capabilities. Scalable licensing schemes for solutions are available.

### **Integrated Solutions**

You can improve your productivity even further with a complete family of corporate workspace solutions that integrate seamlessly with Manage including Book, Reception and Mobile.

Specifications

**Technical requirements**

On premise / Cloud Yes / Yes

On premise (min requirements)

- Min Windows 2012 / 16GB
- IIS
- Net framework 4.5
- MSSQL Server
- 40GB of available space

**Users**

Number of users No limitation

Database compatibility Active Directory

Rights Management Complete access customization, per size, device and content

Active Directory Compatibility Yes

**Facility Management**

Number of sites/rooms No limitation
