

DT12

1' x 2' Drop-In Speaker System

APPLICATION

Installer friendly Atlas Sound DT12 provides clear paging and background music in a labor saving package. Ideal for use in shopping malls, department stores, and anywhere large quantities of loudspeakers are to be utilized.

General Description

The Atlas Sound DT12 1' x 2' drop in speaker system simplifies loudspeaker installation by providing an all in one speaker package in acoustic ceiling grids. The system includes the speaker / transformer, enclosure, and grille with an external mounted tap selector switch. The compact 2-unit master pack is designed to save warehouse space. You will enjoy clear, crisp paging and background music from the installation friendly DT12 without compromising building cosmetics.

Architect & Engineer Specifications

The loudspeaker, transformer, baffle and enclosure shall be the Atlas Sound 1' x 2' drop in speaker system Model DT12. The loudspeaker shall be an 8" dual cone type with an integral 25V / 70.7V matching transformer and externally mounted tap selector switch. Power taps to include .25, .5, 1, 2, & 4 Watt for 25V and 70.7V systems as well as an 8Ω bypass. The assembly to include a speaker enclosure mounted to a 1' x 2' white metal grille.
