

13510 Key / Tool (For modular door stations)

13510 Key / Tool

The Alpha Communications® / S.T.R.™ Model 13510 key / tool is used for installation and maintenance of many of our intercom systems and/or video-intercom systems, using the S.T.R.™ modular style door entry station(s). The 13510 key / tool is also used for installation and maintenance of the FS1000, FS1500, FSE1500, VFS1000 and VFS1500 series intercom and video-intercom stations (and others).

While not required for system operation, most specifications call for the installing contractor to provide the facility with any "special tools" required for proper system maintenance. We recommend that the installing contractor provide a model 13510 key / tool, with each modular style door station, on an intercom or video-intercom system.

Architects' And Engineers' Specifications

Contractor shall furnish one (or more) Alpha Communications® / S.T.R.™ model 13510 key / tool, or approved equal.

Key / tool(s) shall be used to provide access to the Alpha Communications® / S.T.R.™ modular series entry door station(s), or intercom or video-intercom stations, by the building or facility management, or service company
