Typical COILED Cord

BF Series Station Connecting Cords

The Alpha Communications® 'BF' series station connecting cords are used with many 'AA' (master) and 'AB' (remote) series intercom stations.

These cords are designed to plug into the intercom station(s) and then plug into the flush or surface wall jack(s), where they are hard-wired to the system wiring.

The various models are available in different lengths and in 'straight' or 'coiled' configurations, to meet your individual requirements. All models have plug-in connectors on both ends.

Models / Types

- **BF640***: 6' Straight Cord--8 Pin--Beige
