

Get Reale. Get Beale.

BS650 IN CEILING 6.5" 2-WAY

Our BS speaker is exactly that...**B**asically the **S**ame as many other entry level speakers on the market today. No Sonic Vortex, no fancy crossover network, nothing special at all... except that we're actually willing to admit it. It works, it sounds good for what it is and it's priced to match.

The BS650...when the budget for the good stuff just isn't there, or just doesn't matter in the first place...Just Keeping it Reale..

Optional EZBracket pre-construction bracket; use size "F" for this model.
