

Battery LifeTester™

ELK-BLT

**LIFETIME
WARRANTY**

The ELK-BLT Battery Life Tester or .Mhos Meter. is a compact, easy to use service tool for testing 12 Volt rechargeable batteries. The BLT measures internal conductivity (Mhos), which is the best indicator of a battery's health and life expectancy. Mhos happens to be the inverse of Ohms (conductance as opposed to resistance). The BLT operates as follows: For each battery brand and size installed you should start by measuring and recording a .baseline. Mhos reading. Then, during any service call or inspection simply measure and record the current (most recent) Mhos reading. Always compare the current Mhos reading with the original reading.

FEATURES

- Compact, Low cost, and easy to use
- Does not discharge or damage the battery
- Warns if battery voltage is too low
- Numeric LED display shows battery voltage, and Mhos reading
- Replaceable test leads
- Includes Padded Carrying Case
- Includes Self-Adhesive Test Data Labels
- Lifetime Limited Warranty

SPECIFICATIONS

- Operating Voltage: 10V - 14 Volts D.C.
- Current Draw: 1.1 Amps Max., 0.0016Ah for full test
- Battery Leads: ~12 Inches
- Enclosure Size: 4.4" W x 3" H x 1.15" D without carrying case
