The 8-Port Gigabit Switch is a structured wiring solution designed to meet the needs of today's bandwidth-intensive networking applications. After a plug and play installation, it is capable of transmitting gigabit-speed Ethernet through the network. I

Features & Benefits

Automatically runs at fastest possible speed on each port

9000 byte jumbo frames supported

Power supply not included. Recommended PW7760

Double bay module design fits perfectly into On-Q enclosures

Energy-Efficient Ethernet compliant (IEEE 802.3az)

Specifications

General Info

UPC Number	804428027058	Product Line	On-Q

Listing Agencies / 3rd Party Agencies

CE	Yes	CE ListingNumber	CE

Additional Information

RoHS Conformant	Yes
