

## XTS5.5

The XTS5.5 uses a high performance 5.5" FHD IPS LCD display with a maximum resolution of 1920 x 1080. The XTS5.5 display also features projected capacitive technology, the latest touch technology used in smartphones and tablets, enhancing the XTS5.5 with a quicker response time, high durability, and excellent optical performance.

By placing the powerful MyRussound™ App in a permanent location on a wall, the XTS5.5 gives you full control and easy access to your Russound system, eliminating the need for your phone or tablet to simply change the volume or switch favorites. The XTS5.5 gives you not only the benefit of controlling your entire Russound system from one interface but grants full access and control to your Russound system at any time by placing the MyRussound App in a permanent location and provides metadata feedback from compatible sources, including song titles, artist name, album titles, and album art.

Shadow-free  
Backing
