

STI Break Glass Stopper®

STI-6100

STI-4130

NOTE: Glass is clear — only appears dark for photo purposes.

PRODUCT OVERVIEW

Accepted by many fire marshals, these versions of the world famous STI Stopper® II are designed for areas where a "break glass" cover is specified, such as unsupervised areas. Each device consists of a red polycarbonate cover, mounting frame, a pane of single-strength clear glass (easily replaced when broken), a glass-breaking bar, screws and anchors for installation. Gaskets are also available to improve weather resistance.

HOW IT WORKS

Three models are available for fire, the smaller STI-6100, the larger STI-4100 and the STI-4130 for surface mount; the STI-4130 is the SUB-900-R conduit spacer and the STI-4100, the spacer will add two inches of depth and accommodate up to ¾" conduit. A fourth "generic" model (STI-6700) is available to cover devices other than manual pull stations. The same size as the STI-6100, it includes a wall mount hanging clip for keys, etc. This model for non-fire applications simply says, "BREAK GLASS."

FEATURES

- Housing is molded of super tough polycarbonate material.
- Aesthetically appealing.
- Fire alarm remains clearly visible and accessible.
- Fast, easy installation.
- Glass replacement is simple.
Suggestion: Order extra panes with each unit, for immediate replacement.
- Accepted by many fire marshals. Obtain local fire marshal approval prior to installation.
- Gaskets available to improve weather resistance.
- Typical working properties of polycarbonate are -40° to 250°F (-40° to 121°C).
- Three year guarantee against breakage of polycarbonate in normal use.

STI Break Glass Stopper®

Dimensions and Technical Information

MODELS AVAILABLE
