

STI Universal Button

UB-1

UB-1/LTUL

PRODUCT OVERVIEW

This momentary button helps eliminate having to stock dozens of push buttons, and wasting precious time and money tracking down just the right button for a customer. It offers many options to provide just what a customer wants in one convenient package. Button is ready to be assembled out of box and is easily installed within minutes on site.

Universal Button offers over 300 different combinations for the price of a standard one configuration button. The faceplate is constructed of cast aluminum metal, allowing it to take tough knocks in stride, and is slightly oversized to cover old plate installation marks. Button package includes: faceplate, three illuminated push buttons, five changeable button messages and ten changeable illuminated activation messages.

HOW IT WORKS

The installer simply has to choose which lens cover, button insert and interchangeable message plate works best for the customers need, and easily snap them in place. This allows the button to be mounted in a matter of minutes instead of waiting weeks for a specific button to be ordered and delivered.

FEATURES

- Momentary button offers many options to provide just what a customer wants in one convenient package.
- Faceplate constructed of cast aluminum.
- Illuminated 12/24 volt LED button and illuminated message light kit.
