## The WP5 Battery Operated Vehicle Detection Systems

### Overview

Considering purchasing the best vehicle detection system on the market today? Sure Action Inc. combines superior vehicle detection with one of the best names in wireless to give you the WP5C. The WP5 processor features outstanding RF protection and is powered by two 9-volt batteries. Average battery life should be approximately 12 months (depending on how often the system is fired). Improved performance, easier programming, and increased versatility give you a system that will become part of your life and can be relied on for years to come. Designed with “simplicity of installation” and “ease of use” in mind, this system is excellent for locations where running wire is not desired or is not possible. The WP5C is a complete system giving you everything you need. A Nema III enclosure houses the transmitter, processor (conformal coated), and batteries. The probe has a standard lead of 25 feet. The box is mounted within 25 feet of the probe. The transmitter for this system is tested to 2000 feet in open air (*Line of sight at four feet above ground level*). Batteries are supplied with the system. Use Lithium batteries for colder climates. A receiver, sounder, and power supply are supplied for inside the building. **The transmitter and receiver are pre-programmed.** *If reprogramming becomes necessary, consult the paperwork supplied with receiver or call technical support.*

WP5C (Complete Short Range System)

### Features

- \* Increases profit by minimizing installation time and manpower
- \* High resistance to lightning and environmental conditions
- \* Covers driveways up to 14 ft. wide (Beside driveway)  
28 ft. wide (Center of driveway)
- \* Non-discriminatory to inbound / outbound traffic
- \* All systems include Probe with a 25 foot lead
- \* Ability to add a second probe (any P500 Series Basic Probe)
- \* Responds only to moving ferrous metal
- \* RF resistance up to 1 GHZ
- \* Avg. Battery life: 12-18 Months
- \* Remote sounders

WP5B (Basic - Wireless equipment *not* included)

WP5C (Complete Single Entrance Short Range)

WP5CLR (Complete Single Entrance Long Range)

WP5CDE (Complete Dual Entrance Short Range)

WP5CDEL (Complete Dual Entrance Long Range)

Short Range Systems = 2000 feet : Long Range Systems = 5000 feet
