

SONY

STRDH590

5.2 multi-channel 4k HDR AV Receiver with Bluetooth®

Upgrade your home entertainment system to work with the latest 4K TVs and HDR picture. Equipped with 4 HDMI inputs, HDCP 2.2 signal handling, and a host of advanced features the DH590 is the perfect combination of high performance video capability and superb sonic fidelity.

Bullets

- 5.2 Ch x 145W per channel (6ohms, 1kHz, 1ch THD 0.9%)
- 4K HDR², Dolby Vision compatibility with HDCP 2.2 support
- HDMI®4-in/2-out with Audio Return Channel
- Built-in Bluetooth lets you wirelessly stream from other Bluetooth devices¹
- S-FORCE® PRO front surround sound
- Dolby® TrueHD and dts® HD Enhanced Audio Codecs
- FM Radio with 30-station presets
- Pure Direct mode for improved signal clarity and detail
- Low-profile design (5 ¼" tall) fits easily into conventional AV cabinet

Features

5.2ch surround for cinematic surround sound

Immerse yourself in movie action with a 5.2 channel surround sound that brings the cinema home.

Bring it all together

A truly dynamic home entertainment setup. There are four HDMI inputs and two outputs, plus optical/coaxial digital and analog audio connections so that you can connect your TV, UHD Blu-ray Disc™ player, gaming console and more, quickly and easily.

Enjoy consistent 4K quality

Maintain 4K quality from source to screen² – the 4K pass through feature allows data to pass through the receiver without compromising image quality, and is HDCP 2.2 compatible.

See clearly with High Dynamic Range

With support for High Dynamic Range (HDR) signal pass-through, you can enjoy the incredible jump in image contrast and brightness it brings—and the additional shadow detail and highlights further enhance picture detail and brings colors to life. Latest HDR standards such as HDR10, HLG (Hybrid Log-Gamma) and Dolby Vision™ are supported.

Optimize home entertainment with Digital Cinema Auto Calibration

Digital Cinema Auto Calibration (D.C.A.C.) automatically optimizes sound based on where you sit in relation to your speakers, to help give you the best from your home cinema system.

Easy, virtual surround with S-Force® PRO Front Surround

Ideal for smaller rooms, S-Force® PRO Front Surround delivers a virtual surround acoustic field using only two speakers.

Smarter Bluetooth® connectivity

Not only can you wirelessly stream and play music from other Bluetooth devices, but with Bluetooth Standby, you can turn on your receiver remotely, and even play back and control your music with voice assistant smart speakers such as Amazon Alexa¹.

Low-profile design

Low-profile design (5 ¼" tall) fits easily and conveniently into conventional AV cabinets

FM tuner with 30-station presets

An FM tuner with 30 digital presets with station names, as well as auto tuning.

SONY

The Way The Artists Truly Intended

Enjoy the subtlest nuances of studio-quality sound in higher-than-CD quality with High-Resolution Audio. Passion for music unites every component from signal to speaker, so it feels like the artist is performing right in front of you.

DSD decoding

Co-developed for High-Resolution Audio by Sony and Philips, the companies behind the original CD format, DSD offers a revolutionary way of capturing and playing back audio. Its sampling frequency is 64-times that of CD.

Constructed for precision

A reinforced rigid, frame and beam chassis design reduces external speaker sound pressure and vibration to help maintain signal fidelity for more focused, powerful sound.

The metal framework protects the circuits

The metal framework and heat sink bracket shield the circuits from sound pressure and radiation, for high-rigidity and clearer sound quality.

Power amplifier for minimal distortion

The power amplifier uses a glass-epoxy circuit board for reduced vibration and distortion, giving clear, high power from each of the discreet amplifiers.

Large capacity power transformer built for clarity

Large capacity power transformer built for clarity.

Expertly designed to prevent overheating

The heat sink is specially designed to maximize air intake, keeping the amplifier circuit cool to reduce distortion and increase reliability.

Specifications

Amplifier/Receiver		
Audio Features	A/V SYNC	Yes (Fixed)
	A/V Sync Time/Sampling Frequency	60msec
	Cross Over Frequency	17 points (40-200Hz)
