TekTone®
COMMUNICATIONS FOR TODAY … AND TOMORROW.

Tek-CARE150 Nurse Call Systems Rev. 14 - 6/2021

Features

- Routine audible-visual signaling
- Emergency audible-visual signaling
- Voice communication and monitoring
- Push button operation
- Nurse-follow capability
- Modular design
- Integrated circuit technology

Description

The basic Tek-CARE®NC150 series Audio/Visual Nurse Call System consists of patient calling stations; emergency call stations; a master intercom/annunciator station including amplifier, dome lights, zone lights; and reliable, solid-state control and power supply equipment. The flexible, modular design permits simple, customized installation.

Emergency signals are distinctively identified by a rapid pulsating of all visual and audible signals associated with the calling station. If routine and emergency calls are present simultaneously, emergency signaling is given precedence. Emergency audible signals can only be canceled at the point of origin.

Sensitive two-way voice communication, Nurse Follow, Tone-Off, and Tone Call functions are push button selected.

Optional equipment is available to provide for staff stations, duty stations, remote visual annunciator, master handset, and a third priority level annunciation.

Listings

TekTone's quality system is registered by DQS to the ISO 9001:2015 standard.

NOTES:
1. For SF-series emergency switches, use single-gang ring, or single-gang ring and double-gang box.
2. For LI-series dome lights, use double-gang ring (or double-gang ring and box).
3. For AM- and CM-series apartment panels, see specification sheets.
4. For IR300-series nurse call stations, use Steel City #3GC and #H3BD or exact equivalent.
5. For IR150B-series, use Steel City #3GC and #H3BD. If space is limited, use ARC-CO #2GBD and #3GC.
6. For IR150SS Station, use OH600 flush housing mounted horizontally.
7. The last two digits of frame and housing model numbers indicate the number of gangs (i.e., panel capacity). Exceptions: IH101, IH103, OH600, OH601.
8. Attach the IH103 mounting plate to a finished wall, single-gang box, double-gang box or square masonry box.

IR150B Staff Station

Description

The IR150B Staff Station provides for efficient use of the nursing staff by permitting fast reliable communication.

Used with TekTone's Tek-CARE® NC200 and NC150 nurse call systems, the IR150B provides reliable two-way, hands-free communication between the nurse master station and utility room, examination rooms, kitchen, or any other location where staff members may need to originate calls. Calls are placed by use of a momentary push button. Solid-state indicators on the panel indicate that a call has been placed and that the intercom is in use.

- In-use indicator when intercom audio path is active
- Reset button
- Sensitive speaker/microphone
- Attractive and durable flame-retardant (UL® 94V-0) plastic panel

Description

The IR151B or IR152B Patient Station provides for efficient use of the nursing staff by permitting fast and reliable communication between staff and patient. Calling the nurse is accomplished by pressing the call button on the end of a 6′ or 10′ long call cord. A non-resettable call is registered if the call cord is accidentally removed from its jack.

Call-placed assurance and intercom operation are indicated by solid-state LEDs. The speaker/microphone is sensitive enough to assure clear conversation, even with weak patients. A reset button is provided on the durable, flame-retardant (UL® 94V-0) plastic panel.

Tek-CARE Nurse Call and Wireless Nurse Call Systems • Rev. 24 - 10/2019

Features

- Oxygen safe
- Impact resistant and waterproof
- Small, lightweight pendant fits comfortably in hand
- Bed clips included
- UL® 1069 Listed; SF301A is also UL®2560 Listed

Description

The TekTone® SF301A (single) or SF302 (double) call cords are for use with the Tek-CARE® nurse call systems and wireless emergency call systems, where ¼" phono jacks are used. Ten-foot cords are also available as SF301A/10 and SF302/10. The SF301A and SF302 are oxygen safe call cords certified safe for use by all patients receiving oxygen therapy. These waterproof and impact resistant call cords have completely sealed push buttons.

Listings

SF301A is UL® 1069 and UL® 2560 Listed; SF302 is UL® 1069 Listed; UL® File Number E71599.

Specifications

Dimensions:	7' (2.13 m) long polyvinyl covered cord
Construction:	SPST-1A switch, Integral brass, fine silver contacts 1 AMP, 115 watt maximum, AC
Connections:	¼" (6.35 mm) plug-in phono jack

Features

- UL® 1069 Listed
- Sensitive touch activation
- Oxygen tent safe
- Ideal for geriatric use
- Momentary, air-activated switch
- Adjustable bed clip(s)

Description

TekTone® SF301G and SF302G Call Cords are for use with Tek-CARE® nurse call systems and wireless emergency call systems where ¼" phono jacks are used.

SF301G and SF302G Call Cords are specifically designed for use in geriatric and oxygen environments, but may also be used in general applications. To place a call, the patient applies slight pressure to the squeeze bulb using any part of the body. The force of air through the vinyl tubing closes a switch in the plug, thus placing a call. An adjustable bed clip is supplied for the SF301G and is attached to the call cord. Two adjustable bed clips are supplied with the SF302G.

Features

- UL® 1069 Listed
- Simple, reliable operation
- Call-placed indicator
- Call activates light on annunciator panel, corridor light and/or zone light.
- Corridor zone light capability
- Mounted on attractive flame retardant (UL® 94V-0) plastic panel

Description

The SF156B Code Station is used to operate all system code signals (except supervised code blue applications). It may be used independently or connected with other call stations.

Placing a code call is accomplished by pulling the slide-switch located at the center of the panel to the down position. Returning the slide-switch to the up position cancels the call.

Features

- UL® 1069 Listed
- Waterproof if installed per manufacturer's instructions
- Call-placed indicator
- Call cancel at point of origin
- Attractive, flame-retardant (UL® 94V-0) plastic faceplate
- 1.1" (28mm) wide pull-down lever
- Washable TPU plastic pull cord kit is included

Description

The SF337C Emergency Shower Switch is for any location where activation of an emergency signal is required. The design is such that it may be located anywhere in a shower, bath or tub room, regardless of environmental conditions. The combination of rubber-grommetted mounting screws, rubber mounting gasket, and completely sealed front faceplate make it waterproof (if properly installed). Electronic components are mounted on a circuit board, including an industry-proven reliable reed switch for call initiation. The activating magnet is mounted on the large pull-down lever, which is completely sealed in plastic. The indicator LED is also completely sealed.

Due to the flexibility of its design, the SF337C may be used as a pull cord or as a pull down activated emergency switch. The pull cord supplied may be used for emergency call activation, or if desired, the large 1.1" (28 mm) red pull-down lever may be used. Dome light and system annunciation vary according to the manner in which the SF337C is connected.

Features

- UL® 1069 Listed
- Simple, reliable operation
- Call-placed indicator
- Buzzer for audible annunciation
- Mounted on rugged, flame-retardant (UL® 94V-0) plastic panel

Description

The LI150B Duty Station provides an indication of incoming calls in work areas away from the nurse call master station.

Normal calls are indicated both visibly by steady illumination of the solid-state LED light, and audibly by a slow pulsating tone. Emergency calls take precedence and are indicated by flashing of the LED light and a rapid pulsating tone. A tone-off switch permits silencing of the tone signal for routine level calls only.

Features

- UL® 1069 Listed
- Snap-in lens
- Easy bulb replacement
- Attractive flame-retardant HIPS30 plastic panel
- Excellent visibility

Description

The LI381 Corridor Light and LI382 Corridor Zone Light provide visual indication of calls when used with a nurse call system, emergency call system, or similar application. Emergency calls are indicated by the rapid flashing of the LI381 Corridor Light associated with the calling station. Normal calls produce a steady illumination.

The LI382 Corridor Zone Light indicates an emergency call by the rapid flashing of the red-covered bulb associated with the zone or area from which an emergency call has been placed. Normal calls are indicated by a steady illumination of the white bulb. If an emergency and normal call are placed in the same zone at the same time, the red covered bulb connected to the emergency station will flash rapidly, while the white bulb associated with the normal call will maintain a steady illumination.

The standard mounting plate accommodates both models and features an easily removable white flame-retardant translucent polystyrene plastic lens for bulb replacement.

Power:	LI381:	24 VDC or VAC, 51mA	
	LI382:	24 VDC or VAC, 102mA	
Finish:	White flame-retardant translucent polystyrene plastic lens mounted on a flame-retardant (UL® 94V-0) plastic panel.		
Housing:	Fits either standard dual gang box and ring or single gang box and ring.		

Applicable Systems

Tek-CARE® NC110, NC150, NC200 or NC300II Nurse Call System
Tek-CARE®500 Wireless Emergency Call System with NC50xES-series remote receiver
CM800 Emergency Call System

Tek-CARE Nurse Call and CM800 Emergency Call Systems • Rev. 6 - 11/2020

Features

- Long lasting LEDs
- No bulb replacement needed
- Plug-in connector supplied
- Attractive flame-retardant plastic panel

Description

The LI382LED Corridor Zone Light provides visual indication of calls when used with a nurse call system, emergency call system, or similar application.

The LI382LED Corridor Zone Light indicates an emergency call by the rapid flashing of the two red LED bulbs associated with the zone or area from which an emergency call has been placed. Normal calls are indicated by a steady illumination of the two white LEDs. If an emergency and normal call are placed in the same zone at the same time, the red LEDs connected to the emergency station will flash rapidly, while the white LEDs associated with the normal call will maintain a steady illumination.

The standard mounting plate features both one- and two-gang mounting options.
Listings

UL® 1069 Listed; UL® File Number E71599.

Specifications

Dimensions:	4.8"H × 5.0"W × 2.75"D (122 mm × 127 mm × 70 mm)
LEDs:	2V 20mA per LED
Power:	24 VDC
Finish:	Base is flame-retardant (UL® 94HB) plastic. Lens is flame-retardant translucent polycarbonate plastic.
Housing:	Fits standard one- or two-gang box with one- or two-gang ring.

LI382LED Corridor Zone Light

Required Components

Tek-CARE® NC110, NC150, NC200 or 300II Nurse Call System
Tek-CARE®500 Wireless Nurse Call System with NC50xES-series remote receiver
CM800 Emergency Call System with CM800-series speaker panel

Features

- UL® 1069 Listed power & control unit.
- UL® Listed Class 2 transformer.
- Provides steady light and slow tone for normal call; flashing light and rapid tone for emergency call.
- Routine and emergency commons incorporate short-protection circuitry.
Description

The IH151NK Power & Control Kit includes a UL® 1069 Listed PK152 Power & Control Unit and an SS106 UL® Listed Class 2 Transformer, preinstalled in a 19-gauge cold-rolled steel housing. Knockouts are included on all sides except the lid, to allow connection of electrical conduit from any direction. The lid has a knockout which can be used to install an optional key lock.

The PK152 Power & Control Unit contains the electronic circuitry necessary to detect the presence of normal and emergency calls, and to generate audible and visual control signals. It provides steady or intermittent voltages to operate visual signaling devices. The PK152 can also be used as an auxiliary power supply to increase a system's simultaneous call capacity quantity. Protective circuitry has been incorporated to protect routine and emergency call commons from shorts.

Specifications

Dimensions:	Height:	11.75"	(300 mm)
	Width:	11.75"	(300 mm)
	Depth:	3.75"	(96 mm)
Construction:	19 gauge, cold-rolled steel		
Transformer:	24 VAC, 30 VA (SS106)		
Connections:	Pigtails (on PK152)		
Temperature:	0°C–50°C.		
Mounting:	Surface-mounted within 50' of master station		

Specifications are the minimum requirement for system operation. Some systems may require additional equipment. Contact your factory representative for details.

SS102A

SS106

SS102A and SS106 Transformers

PO001 Electric Door Opener

Transformer Features

TekTone's SS102A and SS106 Class 2 Transformers offer compact, easy-to-install low voltage AC power sources for use with various TekTone® intercom systems. Both transformers are UL® Listed Class 2 transformers and will safely take themselves offline when overheated.

The transformers are constructed for easy surface installation or in a standard 1/2" knockout, and may be used in plastic or metal boxes. Primary wire connections are made using the pre-stripped pigtails and ground wire; secondary connections are made using screw terminals.

Specifications

SS102A	120 VAC primary, 16 VAC 10 VA secondary
SS106	120 VAC primary, 8 VAC 20 VA
	16/24 VAC 30 VA secondary

Electric Door Opener Features

TekTone's PO001 Electric Door Opener is for use in unlocking and locking doors from a variety of TekTone remote stations. The door opener can be installed in place of the door lock, or on a door jamb with various door lock sets.

The PO001 is a normally locked type with heavy duty coils, and operates on 8-16 VAC or 3-6 VDC. The unit features a flat face with satin zinc finish and solid brass locking latch for long wear. The PO001 is reversible for mortise-type locks and latches up to 1/2" width and throw, and is ideal for most narrow jamb mortise-type installations. Depending on the specific job requirements, the PO001 can be reversed for right or left-hand door installation.

Dimensions

Faceplate:	1.25" × 5.875"	(31.8 mm × 149 mm)
Case width:	0.9375"	(24 mm)
Case depth:	1.4375"	(37mm)
Latch opening:	1.375"	(35 mm)

Tek-CARE® NC110, NC150, NC200 Nurse Call Systems • Rev. 12 - 11/2016

Features

- UL® 1069 Listed
- High-quality integrated circuitry and electronic components
- Rugged extruded aluminum case
- Provides flashing light and rapid tone for emergency calls

Description

The PK153 Third Priority Control Unit provides the control circuits to operate a higher priority call signal, such as a smoke detector alarm or a code call, for TekTone's Tek-CARE® NC110, NC150, NC200 nurse call systems. When used in conjunction with the IH151NK Power & Control Kit, the unit provides the additional circuitry for a third level of call priority.

Listings

UL® 1069 listed; UL® File Number E71599.

Specifications

Dimensions:	Height:	9.5"	(240 mm)
	Width:	2.375"	(60 mm)
	Depth:	2.25"	(57 mm)
Construction:	Electronic components mounted on printed circuit boards and housed in a rugged extruded aluminum case		
Connections:	Screw terminals		
Temperature Range:	0°C–50°C		
Mounting:	Surface mounted (within 50' of Nurse Call Master)		

Power Requirement: 24 VDC (provided by IH151NK)

PK124K Battery Backup Kit
IL818 Specification Sheet

Features

- Low voltage operation
- Reliable alternate power supply
- Integrated circuit design
- Easy installation

Description

The PK124K Battery Backup Kit provides continuous battery charging so that if power to system equipment is interrupted, standby operating power is provided for up to approximately 6 hours. (Time may vary depending on system size and usage.)

The PK124K kit includes a transformer, a battery charger and two batteries—all preinstalled in a 19-gauge cold-rolled steel housing. Knockouts are included on all sides except the lid, to allow connection of electrical conduit from any direction. In addition, the lid has a knockout which can be used to install an optional key lock. The enclosed single-gang electrical junction box is galvanized steel with a stainless steel cover plate.

TekTone® systems supported by the PK124K include the DS100 Door Sentry & Emergency Alarm System, the CM800 Emergency Call System, Tek-ENTRY® Apartment Entry Systems, and the Tek-SAFE® Area of Rescue Assistance System.

Specifications

Dimensions:	Height:	11.75"	(300 mm)
	Width:	11.75"	(300 mm)
	Depth:	3.75"	(96 mm)
Construction:	19 gauge, cold-rolled steel		
Transformer:	24 VAC, 30 VA (SS106)		
Storage:	Two 12 VDC batteries (BA001)		
Connection:	Screw terminals (on PK124)		
Mounting:	Surface

Description

The NC365B Paging Transmitter receives alphanumeric messages and patient call information via serial interface and transmits the information directly to pagers. Information is sent to the transmitter at 9600 baud to minimize bottlenecks. Call type and location are determined by the system supplying information to the transmitter. The NC365B Paging Transmitter is pre-programmed for use with TekTone® systems for simplified plug-and-play setup.

The system's range depends upon the site and the transmitter's location. To determine the exact coverage, conduct a site survey. Under ideal conditions, the NC365B Paging Transmitter's range is approximately one mile. The unit includes a ¼-wave BNC-terminated antenna to provide coverage that meets most requirements.

NC365B Paging Transmitter

Specifications

Dimensions:	7.48" × 12.99" × 2.76" (190 mm × 330 mm × 70 mm)
Clearance:	7.87" (200 mm) minimum clearance on all sides
Ports:	Scope protocol RS232 serial DB9 COMP2 protocol RS232 serial DB9 8 dry contact inputs configured as Normally Open (#8 is pre-programmed to send RANGE TEST to CAP code 400 using included dummy plug.)
Housing:	Surface mounted
Frequency:	457.55 MHz
Channel Spacing:	12.5 KHz
Adjacent Channel:	Better than 200nW @ 4.5 KHz deviation
Baud Rate:	9600 serial input 1200 transmit
Power:	115 VAC 0.8A, 50/60 Hz input 2 Watt output Consumption less than 50mA standby; up to 2.4A transmit 13.8 Volts DC operating voltage

Required Components

NC397A Pagers plus one of these systems:

- Tek-CARE®400 P5/P5+ Nurse Call System
- Tek-CARE®400 Nurse Call System
- Tek-CARE®NC300II Nurse Call System
- Tek-CARE®120 or 160 Nurse Call System
- Tek-CARE®NC110/150/200 Nurse Call System (requires NC377-series Paging Interface Adapter/Voltage Interface)
- Tek-CARE®500 Wireless Nurse Call System
- Tek-ALERT®Alert Integration System
- NC475 Tek-CARE® Appliance Server

Each paging system installed in the United States is required by law to have an FCC license. The FCC license can be obtained directly by the end user or through an authorized agent. The FCC application process takes approximately two weeks and provides the end user with a ten-year renewable license. To apply for an FCC license, visit: http://wireless.fcc.gov/uls/index.htm.

Paging is an ancillary method of call annunciation, and is not intended to replace the primary annunciation provided by the nurse call system.

Optional Components

BA365K Battery Backup Kit

Phone: 828.524.9967 • Fax: 828.524.9968 • Sales: Choose option 2 • Tech Support: Choose option 3
TekTone's quality system is registered by DQS to the ISO 9001:2015 standard.

Description

The NC377-series Voltage Interface is used with the Tek-ALERT® Alert Integration Manager to connect switched voltage analog systems to the Tek-ALERT system. Tek-ALERT enables such advanced features as consolidated event monitoring, management reporting, and paging for all connected systems. TekTone's Tek-CARE® NC110, NC150 and NC200 Nurse Call Systems, as well as a variety of non-TekTone® systems, use the voltage interface to communicate with the Tek-ALERT system. The voltage interface recognizes three states: off, steady on, and flashing; and can connect systems with input voltage from 5V to 50V, AC or DC.

The NC377-series Voltage Interface can also integrate TekTone's Tek-CARE NC110, NC150 and NC200 Nurse Call Systems directly with the NC369 Paging Transmitter. In this scenario, it connects directly to the nurse call master. The NC377-series Voltage Interface sends nurse call priority information via a serial port to the NC369 Paging Transmitter. The transmitter then transmits this information to the pagers, allowing the staff to distinguish call priority levels.

The voltage interface is available in two configurations: The NC377/32 accommodates 32 inputs, while the NC377/64 handles up to 64 inputs. Connect up to 9 total NC377/64s to the NC365B Paging Transmitter to accommodate up to 576 inputs. (Maximum cable distance from the first NC377-series to the last one is 1,000 feet.)

**NC377-series Voltage Interface
(exterior & interior)**

Specifications

Dimensions:	14"×10"×1.5" (356 mm × 254 mm × 38 mm)
Connections:	Screw Terminals: 9-PIN serial connector
Housing:	Surface mounted
Voltage:	Trigger: 24 volts DC
	Operational: 110 VAC Input
Current Consumption:	Less than 450 mA
Messages Output:	steady on, flashing, and off
BAUD Rate:	9600

Tek-CARE Nurse Call Systems • Rev. 12 - 10/2019

Features

- Alphanumeric
- 2-line 20-character backlit display
- Easy to use large 4-button design
- Preprogrammed with up to 8 user-specified CAP codes
- 4 vibrate patterns and 5 tone alert styles
- Real-time clock
- Message time stamping
- Low battery indicators
- Includes holster belt clip and bungee safety cord

NC397A Alphanumeric Pager

Description

The NC397A alphanumeric pager is a radio pager with a large 2-line display. It includes a holster/belt clip and bungee safety cord. The pager is designed for use with TekTone's Tek-CARE nurse call systems, Tek-CARE500 Wireless Emergency Call System, and Tek-ALERT Alert Integration System.

The pager stores up to 60 messages of 239 characters each. Messages may be selectively deleted or locked into memory. Messages not locked into memory are automatically deleted as new messages arrive (beyond the 60 message limit), with the oldest messages deleted first.

The NC397A Pager may be configured for annunciation via vibration or audible tones, and has one alarm for daily annunciation. It can be programmed to turn on and off at preset times each day.

The NC397A Pager is pre-programmed to receive call information from TekTone® systems.

Required Components

NC365B Paging Transmitter
plus one of these systems:

- Tek-CARE®400 P5/P5+ Nurse Call System
- Tek-CARE®400 Nurse Call System
- Tek-CARE®300III Nurse Call System
- Tek-CARE®120 or 160 Nurse Call System
- Tek-CARE®NC110/150/200 Nurse Call System (requires NC377-series Paging Interface Adapter/Voltage Interface)
- Tek-CARE®500 Wireless Nurse Call System
- Tek-ALERT® Alert Integration System
- NC475 Tek-CARE® Appliance Server

Paging is an ancillary method of call annunciation, and is not intended to replace the primary annunciation provided by the nurse call system.

Specifications

Dimensions:	2.087"H × 2.99"W × 0.67"D (53 mm × 76 mm × 17 mm) without holster belt clip
Weight:	1.76 oz. (50 g) without battery
Protocol:	POCSAG
Operating Freq:	457.550 Mhz
Power:	1 AAA battery
