

## AXIS T8129 Power over Ethernet Extender

The smart solution for covering distances

With AXIS T8129, Axis' network video products can be installed at greater distances than 100 m (328 ft) from one another. By connecting an AXIS T8129 for every extra 100 m (328 ft) of cable, both Ethernet and PoE can be extended to even greater distances; depending on camera model and power source. AXIS T8129 does not require any additional power supply and the connected network camera is fed by a single PoE switch or midspan, simplifying installation. It offers two Ethernet ports, both configured automatically for link speed, duplex and crossover and the full-rate network throughput is maintained.

- > **More than 100 m (328 ft) Ethernet and PoE connection**
- > **Compatible with IEEE 802.3af and IEEE 802.3at**
- > **No additional power supply is required**
- > **Full-rate network throughout the whole extended distance**
