4MP Night Color 2.0 Fusion Network Eyeball Camera
ePoE Dual Fixed-lens Network Camera with Analytics+

NIGHT COLOR 2.0 FUSION

WizMind

WizMind Series devices offer Dahua Analytics+ functions for comprehensive, human-oriented analytic solutions. WizMind Series products are ideal for complex applications with demanding requirements that need advanced analytic capabilities.

- Two (2) x 1/1.8-in. 4MP Progressive-scan CMOS Sensor
- Triple-stream Encoding
- AI Coding, Smart H.265+ and Smart H.264+ Video Compression
- Two (2) x 4MP (2688 x 1520) at 30 fps, 2.8 mm Fixed Lens
- Built-in Microphone and Speaker
- Analytics+ Functions — People Counting, Perimeter Protection, Smart Motion Detection+, Queue Management and Face Detection
- Night Color Technology with IR and White-light LEDs for Color Images in Total Darkness
- Enhanced Power and Data Transmission Distances (ePoE)
- IP67 Ingress Protection
- Five-year Warranty*

System Overview

The Dahua 4MP ePoE Night Color 2.0 Fusion camera offers Analytics+ functions at the edge — performing complex real-time perimeter protection surveillance, Smart Motion Detection+, and face detection. The Dahua Analytics+ algorithms significantly improve accuracy and reliability as compared to standard intelligent features. The camera is ideal for a host of diverse dark applications with low ambient lighting — Night Color Fusion Technology allows the camera to operate in any lighting condition and the IP67 rating makes the camera suitable for the harshest environments.

Functions

Perimeter Protection
Dahua Analytics+ includes Tripwire and Intrusion functions that offer custom tripwires based on object type for automation in limited access areas. Perimeter Protection requires less pixels to detect an object to deliver improved accuracy and decreased false alarms due to lights, weather, trees, or animals.

People Counting
The camera uses complex real-time people counting algorithms to deliver accurate flow statistics from two distinct people counting functions, Line Crossing and Regional. The line crossing function counts the number of people crossing a defined line, and the regional function counts the number of people in a distinct, user-defined area. People counting is ideal for measuring the number of customers entering or exiting a location and to monitor groups of people in a distinct location.

Smart Motion Detection+
Smart Motion Detection+, a component of Dahua's Analytics+ technology, improves alarm accuracy and decreases the number of false alarms. The advanced SMD+ algorithm analyzes a scene for human or vehicle motion, while filtering out other motion due to trees, leaves, animals, weather, and triggers an alarm when detected. SMD+ also saves time when searching recorded video by filtering false alarms and allowing quick retrieval of an alarm due to a person or vehicle.

Night Color Fusion Technology
Night Color Fusion Technology is ideal for dark, low-light scenarios where both covert surveillance and full-color images are required. This technology simultaneously captures video using 2 x 4MP sensors. The first sensor extracts the details of the visible spectrum while the second sensor extracts the brightness of the black and white spectrum. The two images are then fused together to display the best of both worlds without the use of a white-light illuminator.

ArcticPro
The Dahua ArcticPro Series of extreme-environment cameras combine temperature-tolerant components with a waterproof enclosure to ensure flawless operation in temperatures as low as –40° C (–40° F) without the need for an internal heater. The lack of a heater reduces the camera's power consumption and saves operating costs. For applications that demand high-resolution video with advanced features in extremely cold environments, the Dahua ArcticPro Series offers a camera to satisfy the most demanding requirements.

Enhanced Power over Ethernet (ePoE) Technology
Dahua's innovative ePoE technology offers a plug-and-play solution to transmit power and data over long distances via Ethernet or coaxial cables, reducing installation time and saving money. ePoE technology is a viable, cost-effective solution for extending transmission distances and for converting existing, coax-based analog systems into IP systems.

Cybersecurity
Dahua network cameras are equipped with a series of key cybersecurity technologies including: security authentication and authorization, access control, trusted protection, encrypted transmission, and encrypted storage. These technologies improve the camera's ability to prevent malicious access and to protect data.

Environmental
Subjected to rigorous dust and water immersion tests the camera suitable for the most demanding outdoor applications. The camera carries an IP67 rating that ensures protection from total dust ingress and protection from water immersion between 15 centimeters and 1 meter

Technical Specification

Camera

Image Sensor	Two (2) x 1/1.8-in. 4MP Progressive-scan CMOS
Effective Pixels	2688(H) x 1520(V)
RAM/ROM	1 GB / 128 MB
Scanning System	Progressive
Electronic Shutter Speed	Auto, Manual, 1/3 s to 1/100,000 s
S/N Ratio	> 56 dB
Minimum Illumination	Color: 0.0002 lux at F1.0
Illuminator Type	Two (2) IR Lights, Two (2) White-light LEDs
Illumination Distance	50.0 m (164.04 ft)
Illuminator Control	Automatic, Manual, Off
Pan/Tilt/Rotation Range	Pan: 0° to 360° Tilt: 0° to 78° Rotation: 0° to 360°

Lens

Lens Type	Fixed-focal
Mount Type	M16
Focal Length	2.8 mm
Maximum Aperture	F1.0

Analytics+ Functions[2]

Smart Plan Schedule	Enable Analytics+ functions depending on a user-defined schedule. Allows the camera to switch analytic functions based on time.

Perimeter Protection	• Detects human or vehicle violations using the following methods:
	   Tripwire: a target crosses a defined line.
	   Intrusion: a target enters or exits a defined perimeter.
	• Monitors a combination of detection methods.
	• Search and retrieve video based on target type.

People Counting	• Delivers accurate flow statistics from the following methods:
	   Line Crossing: counts a person as they cross a threshold in a defined direction.
	   Region: counts the number of people in a defined area.
	• Counts people simultaneously from four (4) threshold lines and four (4) defined regions.

Queue Management	• Monitors four (4) user-defined regions where people wait in line (or queue). Issues an alarm for the following triggers: **People in Line**: the number of people in line exceeds a minimum threshold. **Wait Time**: time a person waits in line is greater than the minimum queue time
Intelligent Search	Works with a Smart NVR to perform and refine intelligent searches, event extraction and merging to event videos
Face Detection	• Detects and captures a snapshot of a human face within a scene.
Smart Object Detection	• Monitors for an abandoned object offering two functions: **Object-only**: issues an alarm when an object remains stationary for a set time. **People/Object**: issues an alarm when an object is separated from a person. • Monitors for a **missing object**. Issues an alarm if an object is moved from its original position.
Smart Motion Detection+	• Differentiates between and classifies human and vehicle objects. • Filters false alarms due to leaves, lights, animals, and other inconsequential objects. • Extracts human or vehicle objects from recorded video for quick target search and retrieval.
Recommended Detection Distance	Human	Up to 10.0 m (32.81 ft)
	Vehicle	Up to 15.0 m (49.21 ft)

Intelligent Video System Functions

IVS triggers an alarm and takes a defined action for the following events:

Standard Features	• Tampering with the camera. • Error writing to an onboard Micro SD card. • Error sending or receiving data over the network. • Unauthorized access to the camera. • IP Address Conflict
Premium Features	
Missing Object	An object is missing from a designated area.
Abandoned Object	An object is placed in a designated area where no object should be.
Scene Change	A person or object moves the camera to change the scene or covers the camera to obscure the scene.
Fast Moving	Target exceeds a set speed when exiting a defined area
Parking Detection	Vehicle remains in a defined area without motion for a set period of time.
Crowd Gathering	Specified number of people remain inside a defined area for a set time.
Loitering Detection	Target is in motion inside a defined area longer than a specified amount of time.

1. The DORI distance is a measure of the general proximity for a specific classification to help pinpoint the right camera for your needs. The DORI distance is calculated based on sensor specifications and lab test results according to EN 62676-4 , the standard that defines the criteria for the Detect, Observe, Recognize and Identify classifications.
2. Pair a Smart Motion Detection camera with a Dahua recording device that also offers SMD functionality to take advantage of SMD alarm filtering and object classification when searching and playing back recorded video.
