7. Micro USB Charging Port
8. MAC Address
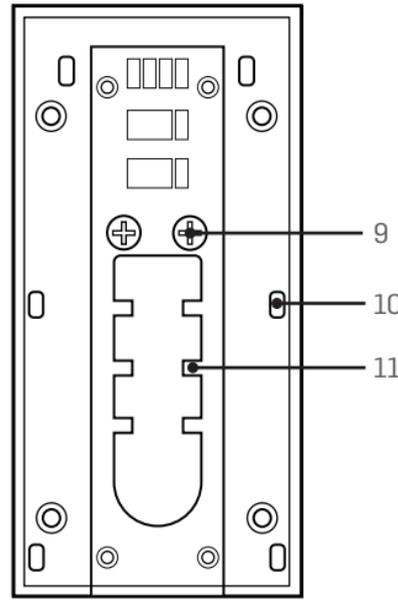

9. Doorbell Wire Terminals
10. Mounting Hooks
11. Wire Management Hooks

Charge your device using a USB-compatible wall charger or laptop. To ensure your device is fully charged, charge the device prior to Wi-Fi setup and installation.

LED RING LIGHTING SEQUENCES

Battery Charging		LED Ring spins blue, then white.
Battery Charging Complete		LED Ring stays fully lit blue.
Call Initiated		LED Ring spins blue.
Call Connected		LED Ring stays fully lit blue.
Hardwired		LED Ring stays dimly lit white.
Setup Mode		LED Ring spins white.
Software Update		LED Ring blinks white.
Factory Reset		LED Ring blinks blue.

Download the Ring app from the App Store Google Play or Windows Store. Open the Ring app and select Setup Device. Follow the in-app instructions to set up your Ring.

You will need your network information (SSID and password) to complete your Ring setup.

INSTALLATION

1. Remove doorbell button and power off your transformer (for wired installation only).

2. Line up the mounting bracket using the provided mounting level.

4. Install the mounting bracket using the provided screwdriver bit, handle and drill bit.

   Brick - use provided screws and anchors
   Concrete - use provided screws and anchors
   Stucco - use provided screws and anchors
   Wood - use provided screws
   Vinyl - use provided screws

5. Remove the mounting level.

6. Connect your doorbell wiring to the terminal screws located on the mounting bracket (for wired installation only).

7. Place the device on the mounting bracket.

8. Tighten the security screws at the bottom of the device using the proprietary screwdriver bit. **Please do not over-tighten the security screws.**

9. Provide power back to your transformer (for wired installation only).

If powering off doorbell wiring, the wiring must be connected to a transformer and a doorbell with a voltage of 8VAC - 24VAC to ring your doorbell chime.

If your chime is electronic (e.g. plays a melody), you may need to install a diode, which is commonly found inside your current doorbell button, or check with your doorbell manufacturer.

Connect the diode to the terminals with the **arrow on the diode facing towards the doorbell chime** as shown below.

Electronic Chime
