

DUO IP/LTE Communicator

The **Dual-Path** solution for Honeywell & DSC Systems!

*cellular data fees may apply

**in progress

Professional IP and LTE Dual-Path Communicator

The new **DUO** is a powerful TCP-IP based bus-level interface to DSC PowerSeries panels and Honeywell Vista panels. **DUO** communicates into a full dual-path solution to help grow your business.

Interactive Services

Combined with the **FREE Connect2Go** interactive service, the **DUO** provides the lowest operating cost in the industry with the reliability of dual-path communications.

Central Station Monitoring With No Third-Party Clearing-House Required

Unlike other providers who sit in the middle between you and your customers, the **DUO** communicates directly to your central station. You do not need a separate account as the **DUO** uses the same account information for IP and LTE, guaranteeing true redundancy.

Sales Information

Connect2Go products are available through all major security distributors, worldwide. Visit www.connect2go.com for distribution information in your region.

Features

- Supports up to 128 zones
- Supports up to 8 partitions
