ICS6-MB

IN CEILING 6.5" SUBWOOFER
POWERED BY SONIC VORTEX®

Multiple International Patents Awarded
Additional Patents Pending

Our Sonic Vortex® technology generates rich, deep bass and effortless clarity from what most people would call a 'back box', but is not. It is actually a compact, integrated tuned enclosure. This patented technology is a 'twist' on Ported Transmission Line design, that optimizes air movement to produce astonishing sound. The enclosure also keeps sound from bleeding to other rooms while adding 6 to 9dB boost in mid-lower bass.
