RESIDENTIAL ALARM COMMUNICATORS

TG-1 EXPRESS LTE

The TG-1 Express, a Telguard flagship product, is a universal cellular communicator that works with almost any alarm panel.

- Supports HomeControl Flex for remote arming, disarming, and more.
- Uses the power and backup battery from the panel.
- Power and dial capture over a single cable for reduced installation time.

TG-4/TG-4B LTE

The TG-4 transmits alarm signals over the nationwide cellular networks if the telephone line has been disrupted or compromised.

- Serves as cell only, primary, or backup communicator for residential and commercial applications.
- Auto format detection for a true plug-and-play set up.
- TG-4B includes battery.

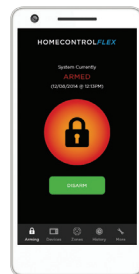

INTERACTIVE

HOMECONTROL FLEX

HomeControl Flex™ allows homeowners to remotely control their security panel.

- Generates additional RMR, while providing an economical remote service offering for end users.
- End user portal and mobile app are customizable with dealer's logo.
- End-users can control multiple properties with the Sites feature, using a single login.

CELLULAR CARRIER INFORMATION

Telguard alarm communicator models are available with either AT&T or Verizon service in the U.S. The AT&T model available in Canada utilizes Rogers, Bell, Telus, and SaskTel networks.

COMMERCIAL ALARM COMMUNICATORS

TG-7E LTE-M

The TG-7E dual path communicator has both wired Internet (LAN) and wireless cellular (5G LTE-M) pathways.

- Highly configurable, including setting primary and backup pathways.
- Power from the panel or via a plug-in adapter.
- LTE-M means no sunset worries and better reception.

TG-7 LTE

The TG-7 provides primary or backup cellular communication solutions for commercial, retail, and industrial markets.

- Provides security supervision with automatic self-test and system trouble outputs.
- Supports multiple alarm formats.

TG-7A LTE

The TG-7A provides cellular solutions for finance and high value retail industries. Ideal for banks, jewelry stores, & pawn shops.

- Attack-resistant, locking, metal enclosure.
- UL Listed for bank, safe, and vault usage.
- Supports multiple alarm formats.
- Includes tamper switch, providing open door alerts.

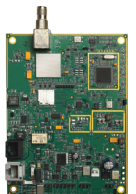

COMMERCIAL INTRUSION & FIRE UPGRADE BOARD

TG-7UBL

The TG-7UBL makes upgrading any 3G/CDMA Telguard TG-7 series communicators to LTE easy and very affordable - simply replace the existing circuit board with a new TG-7UBL.

- Can use existing connections for easy upgrade without having to replace enclosure or power supply.
- An affordable way to increase longevity of a TG-7 series unit.

TG-7FE LTE-M

The TG-7FE dual path communicator has both wired Internet (LAN) and 5G cellular (LTE-M) pathways.

- Power from the panel or via plug-in adapter.
- Use with TG-PEM accessory to work with a DACT-less panel.
- Highly configurable to fit any need, and work with any panel.

TG-7FP LTE-M

The TG-7FP is a 5G LTE-M Sole Path communicator solution that is feature-rich and costs less to purchase and install.

- Powers directly from the fire panel's 12V/24V auxiliary power source.
- Operates on LTE-M networks, for lower power consumption and better building penetration.
- Interfaces with fire panels using a single DACT connection for universal compatibility.

TG-7FS LTE

The TG-7FS is designed for commercial fire systems, meeting UL 864 for sole, primary, or backup path communications.

- 5-min. or 60-min. supervision available (180-sec. in Canada).
- 6-hour and daily self-test options.
- Compliant with NFPA 72 2019 and prior.

 **TELGUARD ACCESSORIES**

TG-PEM

The TG-PEM accessory mounts inside the metal enclosure of TG-7 Series communicators.

- Powers the TG-7FS from the fire panel (accepts 12 or 24VDC); no electrician needed.
- Universal expander adds up to 8 dry contact inputs.
- Interface with a panel in lieu of a DACT.

OTHER ACCESSORIES

- EXDL-0 Omni-directional antenna.
- HGDL-0 High gain directional antenna.
- Low loss cables in various lengths.
- Telguard Virtual Modem universal upload/download.
- Batteries, transformers, tamper switch, and more.

ARLO GO VIDEO SYSTEM

The world's first LTE, 100% wire-free, weather-resistant, mobile HD security camera. No Wi-Fi? No power? No worries!

- Perfect for construction sites, RVs, marinas, or vacation homes - anywhere with Telguard LTE coverage.
- Live stream and recordings are captured in HD.
- Built-in SD card slot for local backup storage.
- Wide-angle PIR motion sensor.
- Arlo Go is available in the U.S. only, utilizing the Verizon network.

ARLO PRO 2 VIDEO SYSTEM

100% wire-free, weather-resistant, HD smart security cameras with sound detection.

- Records 1080p video.
- Rechargeable batteries, with optional AC power or solar panel.
- Two-way audio with built-in speaker and microphone.
- Optional local storage available via Arlo Base Station.
- Arlo Base Station (sold separately) allows access to up to 5 cameras.
