

Digital & Card Access Control Systems

It's one thing to design and manufacture Locking Devices for door access and egress control, it's another thing to tie them all together with Physical Access Control components and systems to both protect people and assets while ensuring code compliance. SDC's digital and card access control systems are engineered to provide real-world door control of a single opening up to 100 doors, from indoor and stand-alone applications, to outdoor and PC-based systems. All while ensuring fire and life safety code compliance along with superior expandability and flexibility in authorization identification, authentication, access approval, and accountability of entities through login credentials - including passwords and personal identification numbers (PINs).

IP-based Access Control

The IP Pro® is a Single Door IP Controller with Expandability, Supporting up to 15,000 Users

FEATURES

- Controls one door directly, with unlimited expansion capabilities
- TCP/IP communications (100/10Mbps)
- DHCP or Static IP addresses
- Password protected built-in web server or FREE downloadable 'Grid' software
- Live transaction monitoring
- Entry & exit reader capability
- Supports industry standard proximity, smart card, and multi-technology readers (Wiegand output)
- Reader short circuit protection
- Compliant with PoE+ standard
- 15,000 users (up to 2 credentials per user)
- Batch card enrollment
- 250 User groups/Time Zones/Door Groups
- Holiday support
- Scheduled Events
- Temporary Users
- Audit Trail – Up to 5,000 events from on-board storage, unlimited events vs PLUS software (limited only by your allocated server space)
- Status LED's – Power, Communications, & Fault on-board diagnostic indicators
- Anti-tailgating
- Anti-passback (global or localized)
- Supported browsers: Microsoft Internet Explorer, Firefox, Google Chrome
- Multiple credential modes: Card only, PIN only, Pin or Card, Pin & Card
- Door Status Monitoring Input
- Request-to-Exit (REX) Input
- Programmable Auxiliary Input
- Lock Relay Output
- Auxiliary Relay Output
- (2) Programmable Solid-state Outputs
- Tamper Input
- Database backup support

MODELS

Install - Expand - Control

- Embedded software
- Browser Accessible
- 1 to 32 doors

- FREE Access Control Software
- PC Accessible
- 1 to 100 doors

EMBEDDED
software managed
via web browser

or Download FREE
SOFTWARE
for full Grid Access

Our new PLUS PC-Client software is available as a free download to provide door access control for up to 100 doors from a single PC. PLUS is a role-based access control software suite with different interface modules, depending on user type.

PLUS Hardware is used by the installer to set up controllers, doors and user profiles

- Enable & edit IPPro controllers
- Enable & edit door settings
- Create event filters
- Enable e-mail notifications

PLUS Manage is used by system administrators to facilitate database changes required on a day-to-day basis, and offers various reporting tools

- Create, view, & edit users
- Add access & holiday schedules
- Generate user & event reports

PLUS Server is used by system administrators to perform specialized tasks, such as database backups, firmware updates, importing/exporting users

- Perform manual or schedule automatic backups
- Import/Export Users
- Perform IPPro firmware updates

Live System events can be monitored from either module!

IP Pro™ Access Control Solution

Single Door Electrified Lock Application

1 Access Control
IP Controller

2 Power Supply 12 and 24VDC Output

3 Wiegand Reader Options (Choose one):
Prox Reader or Keypad-Prox Combo

4 Electrified Lock (Choose one):
Cylindrical or Mortise

5 Power Transfer Hinge 4 Wire, 4" x 4"

SYSTEM OPERATION

Door is normally closed and secured by an electrified lockset.

Authorized Access: Presenting a valid card or entering a valid user code on the reader will momentarily unlock the door for access. The unlock time will be configured by the access control programming. The door may also be programmed for maintained access.

Authorized Egress: Free egress is available at all times by turning the inside lever, retracting the latchbolt, and opening the door.

Emergency Override: The door may be accessed by key override.

Low Voltage: System is powered by a regulated & filtered power supply with 12VDC output for access control equipment and 24VDC output for locking hardware to maximize efficiency. Loss of power will result in unsecured door, unless equipped with optional battery back-up.

IP-based Access Control: User-friendly programming interface via a built-in web server, accessible from any networked PC.

SDC (800) 413-8783 • www.SDCsecurity.com

IP Pro™ Access Control Solution

Single Door Electric Strike Application

1 Access Control
IP Controller

2 Power Supply 12 and 24VDC Output

3 Wiegand Reader Options (Choose one):
Prox Reader or Keypad-Prox Combo

4 Electric Strike (Choose one):
Centerline Latch Entry or No Center Line Relocation*

SYSTEM OPERATION

Door is normally closed and secured by an electrified lockset.

Authorized Access: Presenting a valid card or entering a valid user code on the reader will momentarily unlock the door for access. The unlock time will be configured by the access control programming. The door may also be programmed for maintained access.

Authorized Egress: Free egress is available at all times by turning the inside lever, retracting the latchbolt, and opening the door.

Emergency Override: The door may be accessed by key override.

Low Voltage: System is powered by a regulated & filtered power supply with 12VDC output for access control equipment and 24VDC output for locking hardware to maximize efficiency. Loss of power will result in unsecured door, unless equipped with optional battery back-up.

IP-based Access Control: User-friendly programming interface via a built-in web server, accessible from any networked PC.

IP Pro™ Access Control Solution

Single Door Electric Latch Retraction Application

1 Access Control
IP Controller

2 Power Supply 12 and 24VDC Output

3 Wiegand Reader Options (Choose one):
Prox Reader or Keypad-Prox Combo

4 Exit Device Electric Latch Retraction (Choose one):
Complete Device or Field Retrofit Kit

5 Power Transfer Device (Choose one):
Wire Transfer Hinge or Loops

SYSTEM OPERATION

Door is normally closed and secured by an exit panic device.

Authorized Access: Presenting a valid card/rob or entering a valid user code on the keypad will momentarily retract the latch on the exit device, permitting access. The unlock time will be configured by the access control programming. The door may also be programmed for maintained access (doggings).

Manual Override: Key override is available from the unsecured side via optional active trim.

Authorized Egress: Free egress is available at all times by pressing the exit device pushpad, retracting the latch, and opening the door.

Low Voltage: System is powered by a regulated & filtered power supply with 12VDC output for access control equipment and 24VDC output for locking hardware to maximize efficiency.

IP-based Access Control: User-friendly programming interface via a built-in web server, accessible from any networked PC.

IP Pro™ Access Control Solution

Single Door Magnetic Lock Application

1 Access Control
IP Controller

2 Power Supply 12 and 24VDC Output

3 Wiegand Reader Options (Choose one):
Prox Reader or Keypad-Prox Combo

4 Electro-Magnetic Lock (Choose one):
1200lbs Holding Force

5 Request-To-Exit (Choose one or more):
Push Button & Motion Release

SYSTEM OPERATION

Door is normally closed and secured by an electromagnet lock.

Authorized Access: Presenting a valid card/rob or entering a valid user code on the keypad will momentarily unlock the door for access. The unlock time will be configured by the access control programming. The door may also be programmed for maintained access.

Authorized Egress: Activating the Request-to-Exit (RFX) motion sensor will unlock the magnetic lock allowing the door to be opened. The unlock time will be configured by the access control programming.

Fire & Life Safety: A signal from the Fire Alarm Panel will immediately unlock the magnetic lock.

Manual Release Override: Pressing the code-compliant "Push to Exit" button will bypass the keypad and motion sensor, unlocking the door for a fixed 30 seconds.

Low Voltage: System is powered by a regulated & filtered power supply with 12VDC output for access control equipment and 24VDC output for locking hardware to maximize efficiency. Loss of power will result in unsecured door, unless equipped with optional battery back-up.

IP-based Access Control: User-friendly programming interface via a built-in web server, accessible from any networked PC.

EntryCheck™ 918

Digital Keypad

The SDC EntryCheck™ 918 Series are indoor stand alone digital keypads designed to control access of a single entry point for facilities with up to 500 users. Each user is assigned a personal identification number (PIN). Keypad entry of a valid one to six digit code activates one or both of the output relays which releases an electric door lock.

The SDC EntryCheck™ 918W is designed to interface with most access control systems and provides a standard 26-bit Wiegand output.

FEATURES

- 12-Key Illuminated, Moisture-Resistant 3 x4 Keypad
- Tamper-Resistant Screws
- Single-Gang Mount
- Programmable Site Code (918W)
- Dual LED Status Indicators
- Adjustable Audible Annunciation
- Configurable Illumination: On, Off, Timed
- 4 Outputs, 2 Relay and 2 Solid State
- Outputs Timed or Latching (On/Off)
- Assign Entry PIN's to Relays 1 and/or 2
- LED Status: Access, lockout
- Tactile Keys with Selectable Audible Levels for Key Depression or Output Activation
- Timed Anti-Passback, Anti-Tailgate
- Keypad Tamper Lockout
- Request-to-Exit/Enter Input
- Thick Stainless Steel Faceplate 3/32"

| MODELS | |
|--------|---|
| 918 | Standalone Digital Indoor Keypad |
| 918W | Indoor Keypad with Wiegand Output Single Gang |

PROGRAMMING OPTIONS

The 918 EntryCheck™ includes a Door Sense/Inhibit Input feature. When programmed for “Door Sense”, a door position switch wired into the input and detects a “forced entry” or “door ajar” condition. When programmed for “Inhibit Input”, a maintained switch or automatic timer wired into a the input will disable the activation of

the main relay. The EntryCheck™ also has a request-to-exit input for connection to an exit switch and/or fire access key switch for fire/emergency access. When access is granted, the shunt option is activated shunting alarm contacts on the door or gate. This prevents triggering of an alarm during authorized access.

EntryCheck™ 920 Series Digital Keypads

The SDC EntryCheck™ 920 Series indoor/outdoor digital keypads are designed to control access of a single entry point with up to 500 users. Each user is assigned a personal identification number (PIN). Keypad entry of a valid one to six digit code activates one or both of the output relays which releases an electric door lock. Featuring heavy cast vandal resistant housing and cast metal blue backlit keys.

The SDC EntryCheck™ 920P adds HID proximity reader capability to the keypad. The 920PW is designed to interface with most access control systems and provides a standard 26-bit Wiegand output.

FEATURES

- Digital Keypad with or without Wiegand Output for Universal Compatibility
- Weather & Vandal Resistant Housing with Tactile Metal Keys
- HID-Compatible Proximity Reader (920P and 920PW only)
- 12-Key Illuminated, 3" x 4" Keypad
- Surface or Single-Gang Mount
- Built-In Tamper Switch
- Programmable Site Code (920PW)
- Dual LED Status Indicators
- Adjustable Audible Annunciation
- Configurable Illumination: On, Off, Timed

EntryCheck™ 923 Series Digital Keypads

The SDC EntryCheck™ 923 series narrow indoor/outdoor stand-alone digital keypads are designed to control access of a single entry point for facilities with up to 500 users. Each user is assigned a personal identification number (PIN). Keypad entry of a valid one to six digit code activates one or both of the output relays which releases an electric door lock.

The SDC EntryCheck™ 923P adds HID proximity reader capability to the keypad. The 923PW is designed to interface with most access control systems and provides a standard 26-bit Wiegand output.

FEATURES

- Narrow Digital Keypad with or without Wiegand Output for Universal Compatibility
- Weather & Vandal Resistant Housing with Tactile Metal Keys
- HID-Compatible Proximity Reader (923P and 923PW only)
- 12-Key Illuminated, 2" x 6" Keypad
- Surface, Mullion, or Single-Gang Mount
- Built-In Tamper Switch
- Programmable Site Code (923PW)
- Dual LED Status Indicators
- Adjustable Audible Annunciation
- Configurable Illumination: On, Off, Timed

EntryCheck™ 921P & 924P

Digital Keypads x Secure Electronics

The SDC 921P and the 924P EntryCheck™ are indoor/outdoor stand-alone digital keypads with Prox Reader and Controller (2-piece configuration), designed to control access of a single entry point with up to 500 users. Each user is assigned a proximity card and/or a personal identification number (PIN). Presentation of a proximity card or keypad entry of a code activates one or both of the output relays which releases an electric door lock.

FEATURES

- Weather Resistant
- Heavy Cast Vandal Resistant Housing
- Heavy Cast Metal Blue Backlit Keys
- Keypad Programmable
- 500 Users, Prox card and/or PIN Codes
- 4 Outputs, 2 Relay and 2 Solid State Outputs Timed or Latching (On/Off)
- Assign Entry to Relays 1 and/or 2
- LED Status: Access, Lockout
- Tactile Keys with Selectable Audible Levels for Key Depression or Output Activation
- Timed Anti-Passback, Anti-Tailgate
- Keypad Tamper Lockout
- Request-to-Exit/Enter Input
- Choice of Door Sense/Relay Inhibit Input Functions; Forced Entry, Door Ajar, or Inhibit Relay 1 or 2, Auto Relock When Door Closes
- Choice of 2 Solid State Outputs Functions; Alarm Shunt, Forced Entry, Door Ajar, Tamper Lockout or Keypad Active

EntryCheck™ 925 Series

Digital Keypads

The SDC EntryCheck™ 925 Series outdoor stand-alone digital keypads with Privacy Shroud are designed to control access of a single entry point for facilities with up to 500 users. Each user is assigned a personal identification number (PIN). Keypad entry of a valid one to six digit code activates one or both of the output relays which releases an electric door lock.

The SDC EntryCheck™ 925P adds HID proximity reader capability to the keypad. The 925PW is designed to interface with most access control systems and provides standard 26-bit Wiegand output. Perfect for Post-mount applications.

FEATURES

- Digital Keypad with or without Wiegand Output for Universal Compatibility
- Weather & Vandal Resistant Housing with Tactile Metal Keys
- HID-Compatible Proximity Reader (925P and 925PW only)
- 12-Key Illuminated, 3" x 4" Keypad
- Surface or Single-Gang Mount
- Built-In Tamper Switch
- Programmable Site Code (925PW)
- Dual LED Status Indicators
- Adjustable Audible Annunciation
- Configurable Illumination: On, Off, Timed

EntryCheck® E75

Standalone Electronic Locksets

The SDC EntryCheck® E75 is an indoor/outdoor standalone electronic battery powered solution, providing controlled access for basic and multi-level high security requirements. The E75PS locksets are keypad or PC software programmable, and combine multiple access technology with efficient motorized locksets.

FEATURES

E75K and E75P:

- Keypad or PC Software Programmable
- 3,000 Users, 32 Temporary Users
- 4 to 6 Digit PIN Codes
- 3 Passage Mode Option
- 32 Access Groups, Schedules
- 32 Holidays
- 4 Authority Levels
- Keypad Tamper Lockout
- Mechanical Key Override
- Battery Powered (4AA)
- Blue Backlit Cast Metal Keys
- Weather & Vandal Resistant
- Retrofit Existing Lock Door Prep
- Motorized SDC Cylindrical Lockset
- Heavy Duty ANSI Grade 1
- Vandal Resistant Lever Clutch Mechanism

E75PS additional Features :

- Point-and-Click Microsoft PC-Based Software
- Supports Up to 1,000 Unique Doors
- Manage Individual Door Parameters, Access Schedules, User Groups, Holidays, Temporary Users
- Lock settings and related parameters are easily cloned to other locks, permitting quick multi-lock installations
- Data Import: All lock parameters and user data can easily be imported from existing databases, locks, or spreadsheets
- Database Backup Utility: Password protected SQL dbase may be saved on any PC
- Wireless Information Transfer: Lock programming and audit trail may be uploaded or downloaded using a Bluetooth enabled PC or laptop
- Audit Trail Information: Locks will maintain a record of the last 10,000 events to provide increased accountability. Audits may be downloaded to Excel spreadsheets where information is easily analyzed, sorted or printed
- User Entries Logged with Time and Date
- Remote Input Activation is Logged
- Door Forced/Door Ajar/Duress Alarms Are Logged
- User Reports: Users may be exported to Excel spreadsheets where information is easily sorted or printed

E75PS

Includes Bluetooth enabled software!

SPECIFICATIONS

| | |
|-----------------------|--|
| Power | 4 Size AA Batteries (Alkaline) 100,000 cycles or External 12VDC Power @ 30mA |
| Inputs | 1 Request to Exit 1 Door Position Switch |
| Output | 1 Aux Relay Contacts SPDT 1A @ 30VDC |
| Temperature | 22°F to + 130°F (-30°C to + 54°C) |
| Humidity | 5% to 95% non-condensing |
| Keypad Finish | Q 626 Dull Chrome - Standard B 693 Black |
| Latch Bolt | 9/16" Throw |
| Backset | 2-3/4" |
| Strike | 4-7/8" ANSI A115.2 |
| Door Thickness | 1-3/4" to 2-1/8" |
| Weight | 8.8 lbs |

ACCESS CONTROL ACCESSORIES

HID Prox Cards and Fobs

The **ProxCARD**® proximity access control card is the industry choice for a cost-effective solution to proximity access control, with universal compatibility with all HID proximity card readers. The ProxCARD® proximity access control card provides durable packaging and consistent read range.

The **ProxKey**® is a proximity card keyfob for access control offering HID proximity technology in a convenient, pocket size device. The proximity card keyfob easily attaches to a key ring, badge clip or lanyard. The ProxKey® is built to withstand harsh operating environments or handling.

MODELS

- HID1326-25** HID ProxCARD® II, 25 Cards
- HID1326-100** HID ProxCARD® II, 100 Cards

MODELS

- HID1346-10** HID ProxKey® II, 10 Key Fobs
- HID1346-100** HID ProxKey® II, 100 Key Fobs

DPS-11
Ball Switch

Compatible with swinging or sliding doors. Recommended uses include communicated doors, mantraps, auto re-lock switches and high current applications. (2-3/4" x 1-1/4")

MC-4PAK
Magnetic Switch

Ideal for door status monitoring, the SDC MC-4 is easily installed in hollow metal and aluminum doors and frames (3/4" Diameter). **Comes in Pack of 10.**

MC-4M
Concealed Magnetic Contact

Designed for vandal resistance, the SDC MC-4M is installed in the mortise of a hollow metal or aluminum frame and wood, hollow metal or aluminum door. (4-7/8" x 1-1/4")

MC-7
High Security Magnetic Switch

Biased for high security door status monitoring, the SDC MC-7 guards against false status indication caused by the presence of an additional magnet. Installed in hollow metal and aluminum doors and frames. Recommended for high security applications. (1" Diameter)
