

SMART DOORBELL CAMERA

Answer Your Door from Anywhere Using Your Smartphone

Please visit nortekcontrol.com/gocontrol, or contact your local Sales Manager.

ANSWER YOUR DOOR ANYTIME – EVEN WHEN YOU ARE NOT HOME

With the GoControl Smart Doorbell Camera, you can answer your door from your smartphone. See live video of who is at your door even if you are not home. Have a two-way conversation using your smart phone.

With advanced motion detection, the GoControl Smart Doorbell Camera can alert you to the presence of visitors before they even ring the doorbell. Improve your home security by knowing who is at, or has been at your door. You can even choose to greet the visitor using your smartphone when you are there, or let your visitor think you are home when you are not. You are in control.

You can also see who is at your door, in near total darkness with our advanced Night Vision mode. You'll never worry about how to receive important packages when you're not at home with the GoControl Smart Doorbell Camera: Answer the door remotely on your smartphone, instruct the delivery person what to do with the package, and watch as they complete the delivery and leave.

The doorbell finally gets 'smart' and becomes part of the 'Internet of Things' (IoT). See and talk with anyone at your door using your GoControl Smart Doorbell Camera!

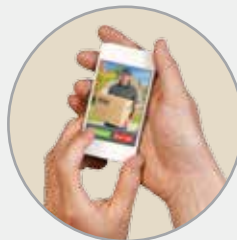

GoControl makes your house a smart home.
