

PRN-7 Desktop Serial Interface Printer

Fire-Lite Alarms is pleased to announce the new PRN-7 desktop serial, dot-matrix printer. The [PRN-7](#) printer is used with Fire-Lite fire alarm control panels to provide a written record of system events and status changes.

Some key PRN-7 features include:

- Time stamps printed on the record of each event and status change with the current time-of-day and date.
- Uses standard 9" x 11" tractor-feed fan-fold paper.
- Provides a hard copy printout of all system events and status changes.
- Provides 80 columns of data at 10 characters per inch.
- Printed records of system configuration and addressable devices parameters

With the release of the PRN-7, the PRN-6F will be discontinued. Once PRN-6 inventory has been exhausted, any orders for the existing product will need to be changed to the PRN-7.

Please contact your Regional Sales Manager or Fire-Lite Alarms Customer Service Representative at 1-800-627-3473, if you have any questions regarding this announcement.

Thank you for your business and continued support.

Sincerely,

Kenneth W. Gentile
Product Manager
