

CDL101B LED Corridor Light with built-in Piezo Buzzer (24VDC)

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The LED corridor dome lights with built-in piezo type buzzers shall be Alpha Communications® **CDL101B** (24VDC) or approved equal. Lights shall include a translucent plastic cover mounted on a flame retardant ABS plastic panel, with a removable divider to allow full height LED brightness. Units shall mount over a conventional 1-gang or 2-gang electrical back box. Units shall feature a high brightness long-life LED to eliminate the need for bulb replacement. Built-in piezo type buzzer shall sound as long as the dome light is lighted (activated).

Contractor shall observe all local and national electrical and building codes.

CDL101B LED CORRIDOR LIGHT WITH BUILT-IN PIEZO BUZZER (24VDC)

The Alpha Communications® **CDL101B** (24VDC) LED Corridor Lamps provide both visual and audible indications of any type of call. Models may be used with an emergency call system or in any application where this type of audible and visual call indication is needed. The standard mounting plate accommodates features an easily removable divider to allow full height LED brightness.

FEATURES

- Excellent Visibility
- Audio call indication
- High Brightness LEDs - No Bulb Replacement
- Durable construction
