

# MRX-4IR

## IP-to-IR NETWORK BASE STATION

### An elegant solution

The MRX-4IR is an elegant little solution for places you don't want to run Cat5 cable or where it doesn't make sense to add a URC Advanced MRX Network Controller. Ceiling-mounted front projectors or TVs that are suspended from a kitchen ceiling are two typical examples where this small piece comes into play.

### Communication over a network

Communicating over a network using Wi-Fi or a wired LAN connection, the MRX-4IR receives commands from the System Controller and relays them, via IR, to other components in the system. It features four "IR emitter outputs" and a front "IR blaster." One classic application is controlling the TV in the kitchen where there is no room for a larger MRX Controller. Or use it to control ceiling-mount projectors, or flat panel TVs over the fireplace. Plus, its small size allows it to fit into places where a traditional base station would not.

### URC Network System Products

The MRX-4IR can also be installed independent of URC's Total Control system and operated by URC Network System Products. This product line includes the MX-5000, MX-6000 remotes and KP-4000C in-wall touchscreen. A typical example is a Sports Bar controlling ceiling-mounted flat panels with a KP-4000C mounted out of harm's way.

*The MRX-4IR lets you keep the wire and boxes out of sight.*

# Tech Talk

## FEATURES

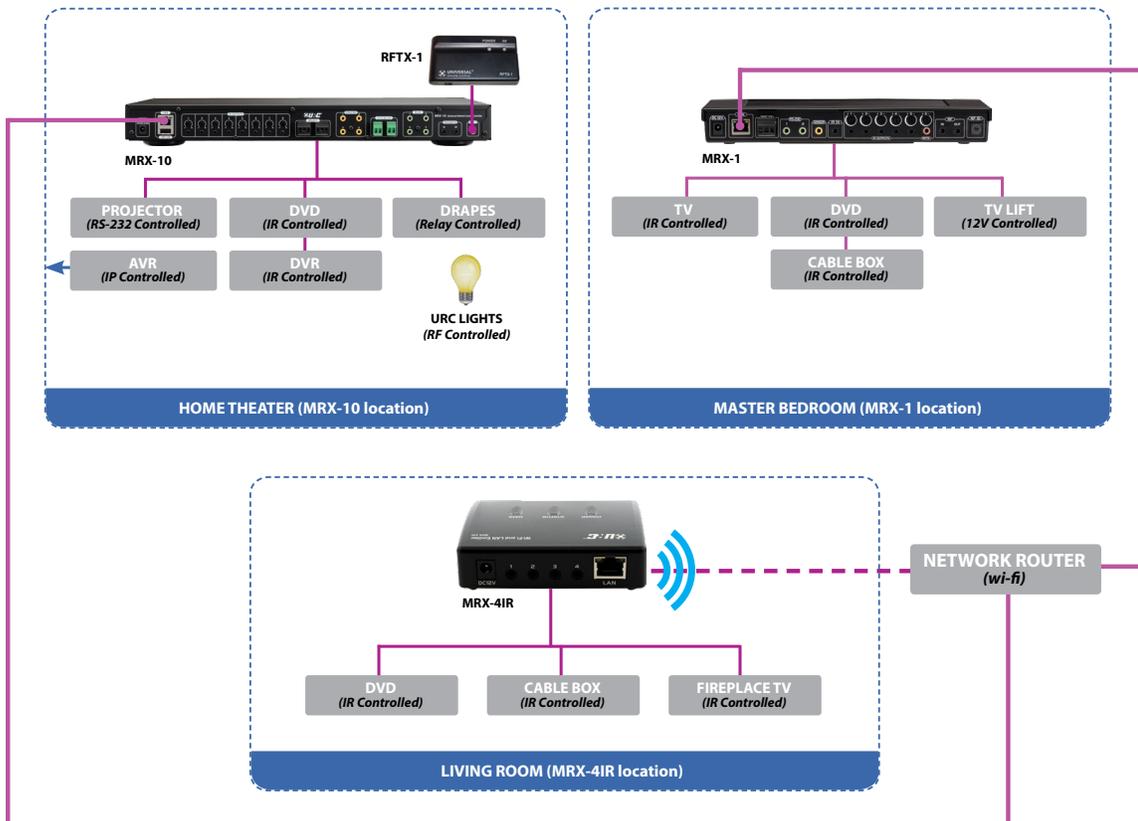

- Converts IP commands from MRX Advanced System Controller to IR
- Four IR emitter outputs (one adjustable, three fixed)
- Built-in front IR blaster
- Very small footprint
- Includes mounting hardware

## SPECIFICATIONS

- **Ethernet:** One (1) Base-T/100 Base-TX network connector
- **IR:** Four (4) emitter outputs and one (1) front IR blaster
- **Power:** 12V external power supply
- **Input:** AC 120V~ 60Hz 9W
- **Output:** DC 12V – 1A
- **Size:** 3.75" (W) x 1.00" (H) x 2.75" (D)
- **Weight:** 3.8 oz
- MRX Advanced System Controller required
- One year USA Limited Warranty
