

THE BRAND THE BIG NAMES TRUST.

For years we've been manufacturing the highest quality plastic Media Panels. With over 1,000,000 installs to date - more than all our competitors combined - our cases are the preferred choice of major providers like Comcast, Spectrum, Telus, Bell, Rogers and many more. Now they're available to you.

HOME OWNERS WANT THEIR WIFI SEAMLESS, NOT SPOTTY.

Metal cans don't work as well for WiFi signals as our plastic enclosures. Why? Metal reflects some WiFi radio frequencies which can lead to signal dropouts. Our engineered plastic is 15x more WiFi transparent than metal for strong, steady connectivity anywhere in the home.

The Best Case for Home Automation

WiFi-transparent Media Panels. The standard for well-connected homes.

primex 

SOHOpro™

Need one good reason to install Primex? Here's Five.

- 1 PLASTIC ENCLOSURES ARE MORE WIFI FRIENDLY THAN METAL CANS.**
Metal reflects part of the radio frequency signal. That's why all our enclosures are plastic, which is 15x more WiFi transparent than metal, delivering better signal strength throughout your client's home.
- 2 ARRIVES FASTER. MADE ON SHORE.**
Made in the USA and Canada, shipped from our manufacturing and distribution centres across the continent, your enclosures get to you when you need them. Our supply chain is rock solid and ready to deliver.
- 3 EASIER, QUICKER TO INSTALL.**
The unique design allows for three types of mounting systems. Multiple knockouts and standardized hole patterns give you maximum flexibility and allow instant reconfiguration on the fly. Plus, you can pre-mount to save even more time.
- 4 TRUSTED BY THE BIG NAMES, OVER 1,000,000 INSTALLS.**
For years we've been supplying telcos and cable service providers with their plastic media enclosures with more installs than all our competitors combined. From Comcast and Spectrum to Telus, Bell and Rogers, our list of satisfied clients is extensive.
- 5 MORE SIZES AND STYLES.**
Maximum flexibility for almost any application. Any size you need: 15", 21", 30", 42", 63" and up. Whether you're installing in tight spaces with our optional narrow/deep frame or within a 24" stud using our extension bracket, there's a Primex enclosure to suit your every need.

Accessories & Components

In addition to enclosures, Primex offers a selection of components and accessories for the connected home. From wall plates and jacks to distribution terminals, get the signal from the Media Panel throughout your clients home.

Fiber Auto-Shutter Jack

Cat5e Jacks

Cat5 Jacks

Cat6a Jacks

3 Line Voice Jack

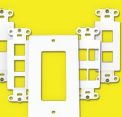

F-Connector Jack

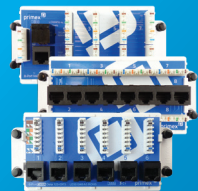

Surface Mount Port

Wall Plates

Modular Wall Plate Inserts

Data/Voice Modules

Cat5e, Cat6 or Cat6A input jacks and eight 4-pair 110 IDC's or RJ45 for preconnectorized terminations provide data and voice distribution.

8-port voice module for tel/fax termination points and an integrated RJ31x jack for security system line seizure.

Combo Modules

Modular units combine Cat6/6A with Coax and voice on one platform.

Coax Splitters

Primex Coax Splitters are purpose-built to meet DOCSIS 3.1 and MOCA 2.5 standards.

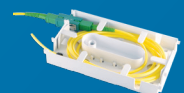

Electrical Kits

In-wall electrical kit with gang box, outlet, faceplate, 4 conduit adapters and integrated cable clamp or rotating surge protected outlet doubler.

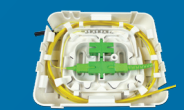

Cable Clip (Hurricane Clip)

The Hurricane Clip is a durable, multi-purpose accessory that provides quick, secure management of cable.

Fiber Transition Case (FTC)

Efficient and adaptable solution for storing up to 3' of fiber drop cable and a simplex connector.

Fiber Transition Outlet (FTO)

Quick-splice solution that manages up to 3' of fiber drop cable.

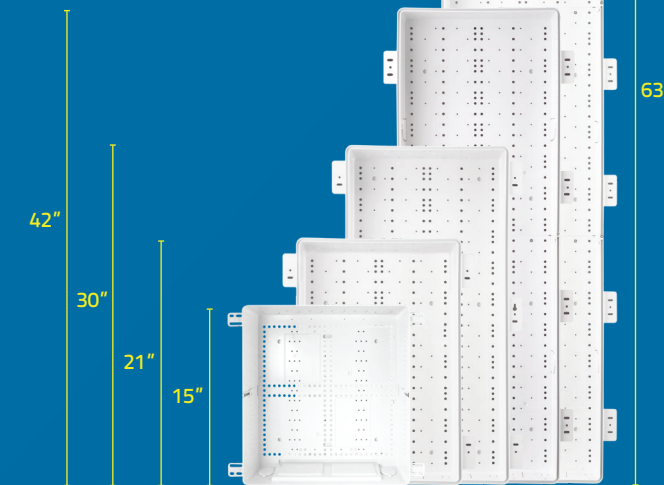

SOHO PRO™ P3000

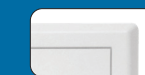

Media Panels

- SOHO Pro™ PR1500 15"
- SOHO Pro™ P2100 21"
- SOHO Pro™ P3000 30"
- SOHO Pro™ P4200 42"
- SOHO Pro™ P6300 63"

Extended Functionality

Primex now offers more ways than ever to install in almost any application.

Standard

Wide lip to cover drywall cut imperfections.

Narrow/Deep

Shared stud, fits in corners, and 1" more depth for large equipment.

Frame Extender

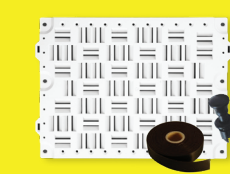

Retrofit to add 1" more depth to standard frame for larger equipment.

Quick and Easy Installation

Primex offers a selection of mounting systems and accessories for your home that allow for pre-mounting of components and plug-and-play installation.

Reduce in-home time by quickly and easily mounting a whole range of components within a SOHO Pro™ Media Panels for an efficient, tidy installation.

Universal Mounting System (UMS)

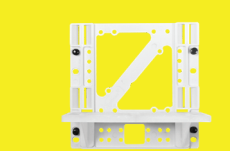

The patented Universal Mounting Plate and tape offer versatile options for mounting smart components.

Rail Mounting System (RMS)

The patented adjustable Rail Mounting Plate and brackets offer quick and easy installation of smart components. Available in 7" or 10".

Shelf Mounting System (SMS)

The Shelf Mounting System provides a stable, secure platform for oversize and heavy smart components.
