**NEW!**

**319** SERIES  
Supervised One-Way  
Wireless Sensors

**Built the *ELK* way for reliability.** Affordably priced for true value!

Compatible with  
**319.5 MHz**  
Wireless Receivers\*  
including ELK's M1XRFEG  
Receiver for M1 Controls

\*Receivers must adhere to the Interlogix™ protocol.  
Interlogix is a registered trademark belonging to United Technologies

By utilizing the 319.5 MHz operating frequency, ELK's 319 Series Wireless offers an economical option for many popular systems, including ELK's M1 Controls.

319 Series Wireless sensors can be used to service existing Interlogix™ systems in need of replacement sensors.

319 Series Wireless sensors feature MaxOut™ Technology for maximum RF power output, increased coverage, extended battery life, and superior performance.

*Solutions for Serious Security and Automation Professionals*
