

Structured Wiring Box

ELK-SWB14

The ELK-SWB14 is a smaller 14.25" square version of the popular ELK-SWB28. It is ideal for smaller jobs such as small homes, apartments, condos, etc. It is extremely versatile for housing a security control and associated peripherals, or for use with telephone, CATV, and network, structured wiring components. Mix and match components from various manufacturers with our flexible hole pattern and mounting accessories. Key features: combination knockouts for size 1/2", 3/4", and 1-1/4" conduit, knockout for standard AC power J box, and heavy duty, tab hinged, lockable cover with camlock.

FEATURES
