

# 19" 2-Post Distribution Rack

## INSTALLATION INSTRUCTIONS

ICC's 2-post racks are designed to be lightweight, sturdy, and easy to install. These high quality, black powder coated aluminum racks will support most EIA 19" rack mountable network devices and hardware such as servers, switches, PBX systems, and other equipments.

Item No.	Height	RMU*	RMU Markings
ICCMSR1948	4 feet	24 RMS	Yes
ICCMSR1972	6 feet	38 RMS	Yes
ICCMSR1984	7 feet	45 RMS	Yes

\*Rack Mount Units

**Hardware Included**

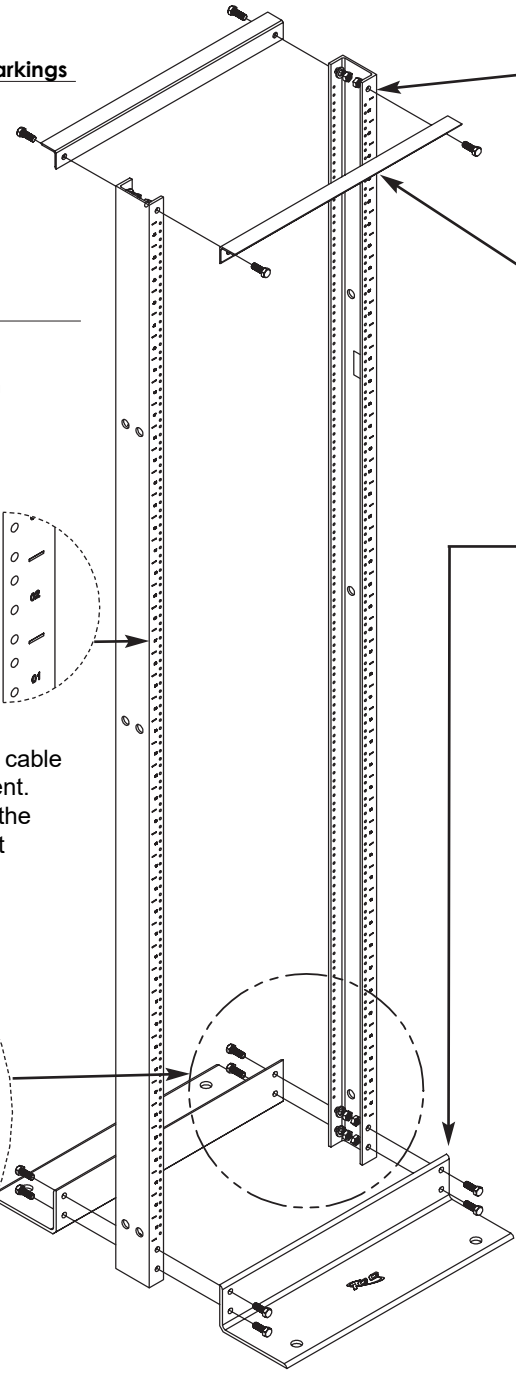

- (2) Top angles - Aluminum
- (2) Base angles - Aluminum
- (2) Vertical mounting rails - Aluminum
- (12) 3/8-16 bolts, black oxide
- (12) lock washers, black oxide
- (12) 3/8-16 nuts, black oxide

**Certification**

EIA 310-D Compliant

**New Feature!**

ICC's Rack Mount Unit (RMU) numbered markings provide consistent vertical alignment and spacing of equipment attachment points for panels, shelves, cable management and associated equipment. RMU numbered markings begin from the bottom to the top of rails for consistent positioning regardless of rack height.

1. Lay the vertical mounting rails on a flat surface with the open channels facing inward.

2. Place one top angle across the top end of the vertical mounting rails. Install two 3/8-16 bolts, lock washers, and nuts as illustrated. **Hand tighten only!**

3. Place one base angle across the bottom end of the vertical mounting rails. Install four 3/8-16 bolts, lock washers, and nuts as illustrated. **Hand tighten only!**

4. Turn the assembly over and repeat steps 2 & 3 for the other side.
5. Stand the assembly up to check for squareness. Make sure the base is level and will rest on a flat surface.
6. Tighten the bolts and torque to approximately 23-30 lb-ft.
7. Anchor the distribution rack assembly to rigid flooring utilizing the four holes on the base angles.

**Note:** Tapped holes are 12-24 threads. Products to be mounted to these rack assemblies should have their own 12-24 mounting screw. ICC provides additional screws in bags of 25 pieces as item number ICACSS01BK.
