HikCentral: Central Management Software (CMS)

Preloaded on server or Software only

Model	HikCentral
Description	Central Management Software (CMS)
Status	Pre Release
Date	May 17, 2017
General Availability	Jul 12, 2017

Summary:

HikCentral is a Central Management Software (CMS) pre-loaded on a Windows-based server. Designed for central management of distributed sites, or large grouping of cameras recording on Hikvision NVRs, DVRs & CVRs

Key Features:

- Modern & sleek user Interface for live view and playback
- Seamless management of 3000 cameras per CMS
- Remote Server Manager(RSM) can be added to centrally manage 100k+ cameras
- Provides advanced user management, including Active Directory Integration
- Includes advanced Event & Alarm management (Video Analytics, POS & more)
- Health Monitoring of all connected devices

Part numbers:

Part#	Description
HiKCentral-VSS-Base/HW/64Ch	**HikCentral Management server** pre-loaded with base version with **64 camera license** (Manage up to 3000 camera recording on NVR/DVR/CVRs by adding HikCentral-VSS-Camera part#s) **Hardware:** E3-1220V5*1/16GB DDR3*1/TB SATA*2 for OS and VMS installation with RAID 1 ; OS: Windows server 12 R2 standard multi-language
iKCentral-VSS-Base/64Ch	**HikCentral Management Software only** base package with **64 camera license** (Manage up to 3000 camera recording on NVR/DVR/CVRs by adding HikCentral-VSS-Camera part#s)
HiKCentral-VSS-Base/HW/300Ch	**HikCentral Management server** pre-loaded with base version with **300 camera license** (Manage up to 3000 camera recording on NVR/DVR/CVRs by adding HikCentral-VSS-Camera part#s) **Hardware:** E3-1220V5*1/16GB DDR3*1/TB SATA*2 for OS and VMS installation with RAID 1 ; OS: Windows server 12 R2 standard multi-language
HiKCentral-VSS-Base300Ch	**HikCentral Management Software only** base package with **300 camera license** (Manage up to 3000 camera recording on NVR/DVR/CVRs by adding HikCentral-VSS-Camera part#s)
Add-ons	
HikCentral-VSS-Camera	1 camera connection add-on (add on to HikCentral-VSS Base, Maximum 3000 cameras per CMS)

Compatibility:
Released Firmware version:

All Hikvision NVRs, DVRs, CVRs

Purchased in North America in last 3 years, MUST update device to latest Firmware revision to ensure compatibility

Appendix A: FAQ

How is HikCentral different from a third-party VMS, such as Milestone, Exacq, or Salient?
HikCentral is designed to centrally manage Hikvision embedded recorders such as NVRs, DVRs, CVRs. For customers who want to record Hikvision IP cameras on a Windows-based server (ex: Dell, HP), we recommend involving a third-party VMS partner that is focused on Windows-based recording.

When is a third-party VMS or HikCentral preferable?
HikCentral is for end-users who require more robust video management software than offered in iVMS-4200. It is not designed to replace a third-party VMS partner already in use. If third-party VMS is in use, the customer is encouraged to continue using the third-party VMS and simply add Hikvision cameras. Alternatively, if an RFP specifies a third-party VMS that actively partners with Hikvision, we would encourage the customer to use the selected VMS with Hikvision cameras.

What type of projects/vertical markets is HikCentral suited for?
Projects requiring central management of Hikvision recorders:
  - *Scalability*
  - *User Management*
  - *Health Monitoring.*

Examples of vertical markets
  - *school boards(Kto12)*
  - *large retailers*
  - *multi-site industrial or commercial.*

HikCentral is best suited for any end-user requiring strong central management of their Hikvision NVRs & CVRs thru an easy to use interface.

HikCentral -Release info:
  - Release is targeted for Q2 2017
  - Product Status: Restricted - sold to HDP's only.
  - Certification Training: 1/2 day certification required (web-ex or in person).
