

NC to utilize the output as a wet contact.

**Jumper** - Use the designated jumper(s) to energize the relay output to be NO

by placing the jumper on the negative (-) and center pins.

### 7. Communication Connections

Wireless (PN: RPW) wireless module comes prefixed with a WiMAC Antenna.

## **Reference Guide**

**Fire Input -** To integrate the fire system using a Red Pedestal controller, refer to wiring diagrams at <u>prodatakey.zendesk.com</u>

**Programming** - After the Red Pedestal controller has been installed, full configuration and system programming will be performed within the pdk io software. Full configuration instructions can be found in the programming manual at <a href="mailto:prodatakey.zendesk.com">prodatakey.zendesk.com</a>

**Reader Compatibility** - ProdataKey does not require proprietary readers. Door controllers accept a wiegand input, including biometric readers and keypads. OSDP readers are supported by using an included jumper (see OSDP reference guide). Contact support for details.

**UL 294 Compliance** - All equipment must meet appropriate UL certifications. For UL listed installations, all cable runs must be less than 30 meters (98.5')

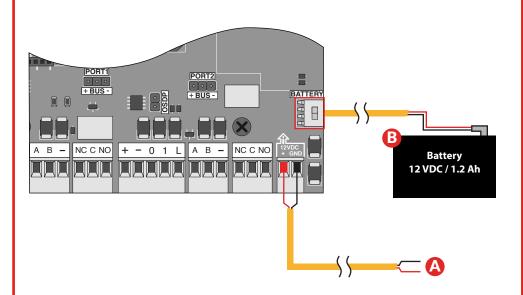

**Part Number** - RPW

#### **PDK Technical Support**

Phone: 801.317.8802 option #2 Email: support@prodatakey.com

PDK Knowledge Base: prodatakey.zendesk.com

#### 8. Power Connection

- A DC INPUT Use included 14 VDC, 2 Amp transformer for DC power input. It is recommended to use 18/2 wire. For high voltage applications, use the HV Converter (PN: HVC).
- **BATTERY** The enclosure will fit most 12 VDC 1.2 Ah batteries. The battery is connected with supplied leads and is polarity sensitive.

## **OSDP Reference Guide**

What is OSDP - Open Supervised Device Protocol (OSDP) is an access control communications standard developed by the Security Industry Association to improve interoperability among access control and security products. OSDP brings heightened security and improved functionality. It is more secure than Wiegand and supports AES-128 encryption.

**OSDP Wire Specification** - Four (4) conductor twisted pair overall shield is recommended to remain fully TIA-485 compliant at maximum supported baud rates and cable distances.

**NOTE** - It's possible to reuse existing Wiegand wiring for OSDP; however, using simple stranded cable typical of Wiegand readers generally does not meet the RS485 twisted pair recommendations.

**OSDP Multi-Drop** - Multi-drop gives you the capability to accommodate many readers by running one length of 4-conductor cable, eliminating the need to run wire for each wire.

**NOTE** - Four (4) is the maximum number of readers each port can support.

NOTE - Wiegand readers will not work when OSDP jumpers are installed.
