ADVANCED MODULAR COMMUNICATOR

Fast Operation. Versatile Installation. Innovative Technology.

The **Advanced Modular Communicator** was designed to provide dealers powerful choices on which communication paths to use, what panels to connect, how to program and what services to deliver the end-user.

LTEM-PA and LTEM-PV Communicators

Resideo is committed to providing the best alarm communication solutions for the security industry. The LTEM-P Communicators easily connects to customers' residential and commercial security system control panels to send alarms and messages to AlarmNet® for transfer to the central monitoring station.

What is LTE® Cat M1?

LTEM-P communicators utilize LTE CAT-M1 technology, used by leading carriers which is specifically designed for IoT devices to provide improved efficiency and signal strength underground and within structures.*

Modular to support changing needs and technologies

Future-focused design to increase lifespan

One communicator works for residential and commercial customers

Strong signal penetration

Multiple communication paths

Control of connected devices

Fast Operation

End-users get quick response times with Resideo Total Connect® 2.0 Remote Services allowing for easy and reliable control over their home or business, setting the new standard for what customers should expect from their security system and smart devices. Harness this powerful speed with new installations or when upgrading an existing system.

LTEM-P Communicators are easily programmed and activated using AlarmNet 360®. The cloud-based software allows for system programming from anywhere, with the flexibility of using the website or mobile app.

Also, the LTEM-P allows for VISTA® 15P and 20P Panels to be fully programmed using AlarmNet 360. The simple programming flow will reduce install time, make technician training easier and reduce programming errors.

*Source: AT&T and Verizon

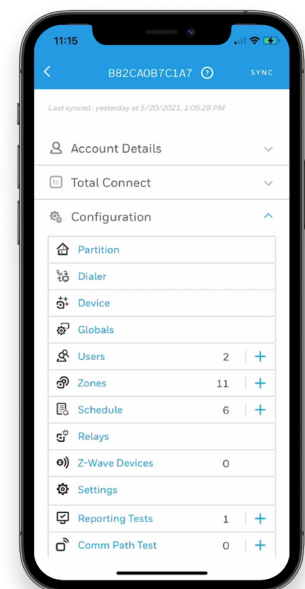

The LTEM-P line includes the following models:

LTEM-PV (Verizon® network)

LTEM-PA (AT&T® network)

The LTEM-P line also supports these optional plug-in modules:

- Wi-Fi®/Z-Wave® Module
- Wi-Fi Module
- Dialer Capture Module
- Cellular Upgradeable Module

- Simple, reliable quick programming
- Quicker technician training times
- Website and mobile app options

Whatever the future holds for cellular technology the LTEM-P evolves with simple end-user upgrades.

Versatile Installation

Competitive Takeover

When you install the LTEM-P you can easily takeover competitive control panel communications to transform outdated security systems into a modern system. Get the benefits of the LTEM-P and Resideo without having to fully replace a control panel. Streamline your business by having more of your accounts on the AlarmNet® network.

The LTEM-P Communicators offers reliable alarm communication solutions available on more control panels, including Resideo, Honeywell Home, Interlogix® and DSC®.

Installation Choices

Advanced Modular Communicator opens dealers up for powerful installation choices. Decide on the communication path, between Cell only, Cell and Ethernet® or Cell and Wi-Fi®. Directly connect to panels using the Dialer, Keybus or ECP connectors.

Innovative Technology

The beauty of the modular design is that it gives you choices within today's technology while future proofing for tomorrow's technology.

Today, choose from add-ons, such as:

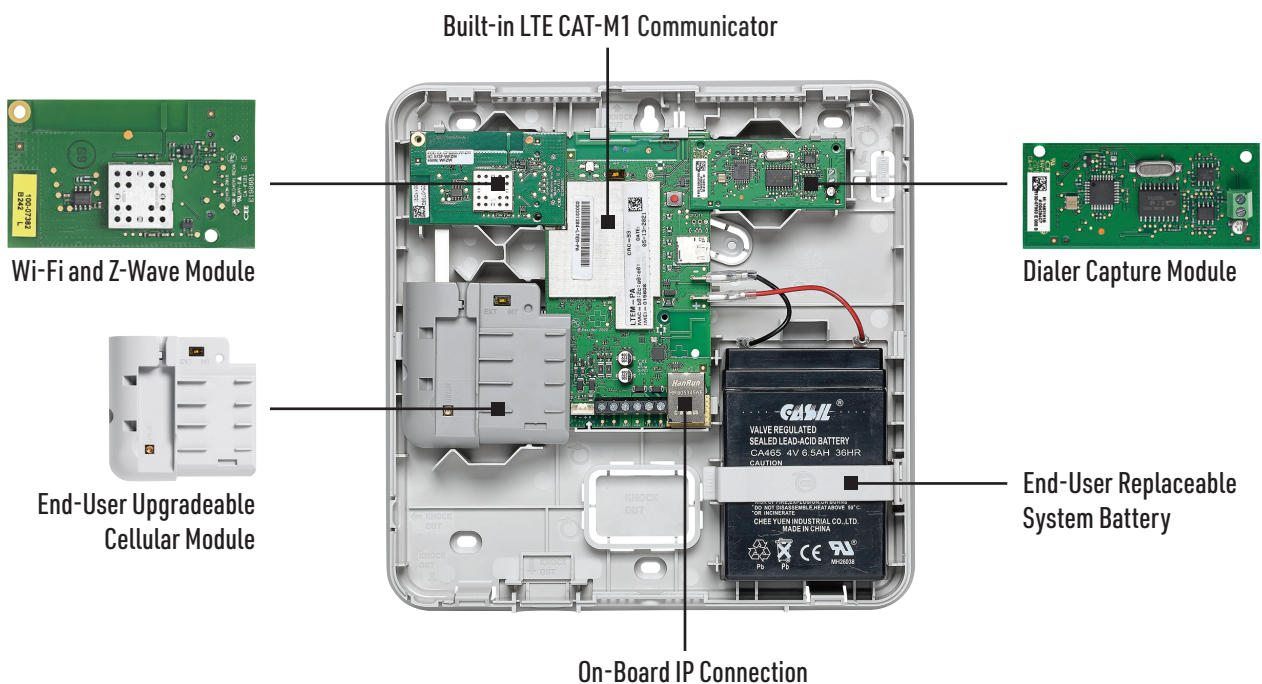

Wi-Fi/Z-Wave® Card to expand communication path choice and give customers control of smart devices without having to install additional keypads

Wi-Fi Only Card to expand communication path choice

Dialer Capture Module to communicate with competitive panels

Optional add-ons mean you only need to buy and install what's needed for each job.

The modular design makes the LTEM-P ready for the technology of tomorrow with an expandable cellular communicator module port. The port will allow a new cellular communicator module to be plugged in and override the onboard LTE® Cat M Cellular Communicator. An end-user can easily perform this action, so there's no need for a truck roll for the next sunset.

Resideo's advanced modular communicator delivers fast operation, versatile installation and innovative technology.

With the LTEM-P you can get anywhere control of security and smart devices through Resideo Total Connect® Remote Services. As a dealer you get an advanced line of LTE® products with improved performance, quick programming, and flexible installation options. Our modular design means you have options within today's technology that prepare you for tomorrow's technology to keep your customers protected.
