

RJ45 Screw Terminal Adaptor Model NV-RJ45A

Schematic

The NVT Model NV-RJ45A is an adaptor used by NVT’s Analog, PVD, and IP transceivers to break out RJ5 conductors to screw terminals.

Eight screw-terminal connections each support wire diameters as large as 16 AWG .051” (1.3mm). Screws should be torqued to 2 in-lbs (0.2 Nm).

It ships two in a package, with colored labels to assist with EIA/TIA 568B wiring assignments.

It is backed by NVT’s award winning customer support and limited lifetime warranty.

Product weight: 0.025 lbs (.011 Kg)
