# ZONING Function

- Up to 3 detection zones with adjustable lengths
- Optimized control of cameras

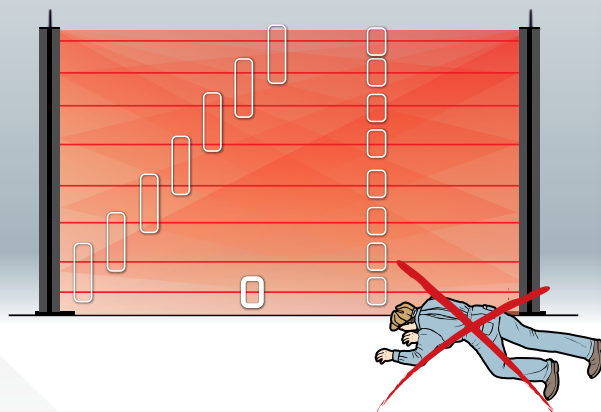

# Maxibus Universal: IP Technology

The MAXIBUS Universal is equipped with an **Ethernet connection**. A secure Linux operating system makes the interface faster and more user-friendly. Each system can be configured locally or remotely through the web server.

# High Performance

- **Mixed cells Transmitter/Receiver**
- **Single / Dual / Triple detection**
- **Bottom beam control**
- **Detection transferred to next beam in the event of a disqualified zone.** (If a beam is blocked or out of alignment, remaining cells continue to detect.)

- **4 communication ports** : can handle up to **128 MAXIRIS columns** (4 x 32 columns)
- **Compatible** with leading Video Management Systems through our SmartDevice connector
- **Remote set-up & maintenance** and alarm log history
- **Graphic view of the columns on site**
