

Adams Rite Rim Exit Devices and Electric Strikes for Narrow Stile Aluminum Openings

Adams Rite is known for durable and reliable door hardware for narrow stile aluminium and glass openings that easily upgrade your door opening to improve safety and security.

Starwheel & Interlocking Rim Exit Devices

Compatible with the 7800 Electric Strike, the 8800 & 8700 Series and EX88 feature a unique bolt design that interlocks the door to frame for enhanced strength and durability.

- 7800 Electric Strike is the ONLY compatible electric strike in the market that accommodates 8800, 8700, and EX88 Series rim exit devices.
- Provides cost effective retrofit solution without modifying the door. No need for wire transfers, door modification or dedicated power supply. 7800 Electric Strike is surface mounted making it simpler to install than a new electrified exit device or electrified trim.
- Provides electrification solution for EX88.
- Unique interlocking solution provides solid security and prevents jamb spreading. The added strength of the interlock makes this ideal for perimeter security applications.

Pullman Rim Exit Devices

The EX89 features a 3/4" Pullman latchbolt that is compatible with the Adams Rite preload capable 74R1 Electric Strike to easily electrify a new or existing opening.

- Unique rounded deadlatch of EX89 designed to work with 74R1 Electric Strike provides smoother user operation.
 - Provides a fully preload-capable solution to avert malfunctions, access and security issues often caused by preload pressure.
 - When used in conjunction with a remote door operator, solution is designed for schools, medical centers, financial institutions, and retail outlets where traffic control and accessibility is required.
- EX88 and EX89 both ship standard with retrofit kits designed to make retrofitting rim exit applications simple and easy to install.

Designed for narrow stile aluminium applications that require a life-safety device, the Adams Rite 8800, 8700 Series Rim Exit Device, EX88 Interlocking Rim Exit Device, and EX89 Pullman Rim Exit Device have strong, durable construction, a clean sleek design and are easy to install. Adams Rite Rim Exit Devices are preload capable and designed for use on single doors or with mullion on pairs of doors.

Now paired with an Adams Rite Electric Strike for a completely electrified Adams Rite solution for narrow stile aluminium openings
