COMPLETEVIEW VMS

Salient Systems provides the industry's most straight forward, cost effective approach to video surveillance and its transition from analog to IP technologies. A significant advantage of Salient's approach is protecting your investment in analog infrastructure as you implement new IP cameras and leverage new technology for future growth. And, the simplicity of CompleteView VMS lies in the consistent user experience from single server to multi-server environments.

CompleteView is a comprehensive VMS solution available in three editions: ONE, Pro and Enterprise. All editions support analog, IP and hybrid designs. Each CompleteView edition includes all clients (video, alarm, web, mapping and Spotlight) and scales from entry-level to enterprise installations.

Seamless analog and IP camera support gives customers the freedom to choose the best technology to meet their needs. Since CompleteView is licensed per camera with no server or client fees, you can mix analog and IP cameras with complete flexibility and you can change the analog license to an IP license at no extra charge. Your investment is protected.

Common Features on all Editions

- Simultaneous record, playback, live view and export
- Video Client
- Alarm Client
- TouchView Apps
- Mapping Client
- Web Client
- CV Spotlight
- Remote software update
- Flexible motion detection
- Independent frame rate control
- Smart Search - based on motion in a defined area
- Multiple monitor support
- Stable Recording Architecture
- Seamless with Analog and IP Cameras
- Dynamic Resolution Scaling
- One time, per-camera license fee - no server or client fees

Integration with Central Station Monitoring Systems	Yes	Yes	Yes

CompleteView	ONE	Pro	Enterprise
Salient Offers CompleteView NVR/Hybrid DVR Systems or Software Only • Server configurations with software pre-installed for easy specifying and a single point of support • Add video capture cards for an enterprise-ready hybrid, analog to IP solution	Yes	Yes	Yes
All Client Software Applications are Included at No Extra Cost • Alarm Client, Video Client, CV SpotLight, Mapping functionality and Web Client included • Unlimited instances of the client can be installed and running simultaneously	Yes	Yes	Yes
Dynamic Resolution Scaling • Video stream is downloaded from the camera and resized for display. Original resolution and quality is recorded • Video is scaled for transmission based on viewing size in the client to minimize bandwidth usage	Yes	Yes	Yes
Stable Recording Architecture • Recorded video files and metadata are stored in small database files which avoids reliability problems • Works with IT backup software; no need to use proprietary 'archiving' feature eliminating limited configuration options and functionality	Yes	Yes	Yes
Enterprise Focused / Scalable • Scales to any number of cameras/servers both in the CompleteView client and server applications	No	Yes	Yes
Seamless with Analog and IP Cameras • Analog and IP cameras are displayed without distinction. Provides for an easy migration from analog to IP when the user is ready • Video inputs may be recorded up to 30 frames per second (FPS)	Yes Yes	Yes Yes	Yes Yes
Easy Licensing - One Time, Per-Camera Fee • IP camera license is not tied to hardware address (MAC address) • All camera licenses are movable without Salient intervention for greater flexibility	Yes	Yes	Yes
Single Seat Administration • Single management application for multi server/multi client environments • Push server and manage client software updates centrally • Control configuration of multiple servers and clients simultaneously • Monitor status of all servers and cameras system-wide from one console	No	Yes	Yes
Advanced Alarm Monitoring • CV Spotlight and Alarm Client provide multiple options for alerting users to security events Using these applications, users can focus on relevant video related to alarm and motion events	Yes	Yes	Yes
Advanced Mapping Client • Definable field of view cones allow the operator to see more than just camera direction • Field of view cones change color to indicate camera status, activity and recording type • Motion is analyzed in real time and results are displayed immediately	Yes	Yes	Yes
Active Directory/LDAP User and Group Support • Import users and groups from Active Directory for seamless login across your network applications • Restrict camera and system access by user or group • Same login and permissions work for Alarm Client, Video Client and Web Client	No	No	Yes
Centralized Web Access • Video Proxy service • Common network access for web/mobile clients to multiple servers • Customize viewer layout based on user • Single management application for remote clients	No	No	Yes
Training and Support • US-based technical support • Certified online training through Salient University eLearning • Classroom certified Reseller Training and Free End User training on CD	Yes	Yes	Yes

About Salient Systems

In the world of video surveillance, Salient Systems Corporation stands apart. Founded in 1995, Salient has over 19 years of experience in video imaging and video management software development.

With an IT mindset, Salient has combined this expertise with a deep understanding of the physical security world and the complex video surveillance demands in mission critical applications. Our products have been designed with both the end user and IT departments in mind and every version of our software includes features specifically created to make them easy to install and use.

Powerful features that reduce bandwidth consumption and manage network resources are standard. Multi-server management tools give users the ability to remotely monitor all recording servers, associated cameras, user activity, storage volumes and more. Client and server updates can be pushed to multiple servers over the network simultaneously thereby reducing the costs to customers.

Our approach to product design and development, sales and marketing, and service and support has made us the voice of integrity in the ever-changing video surveillance market.
