KeySafe™ P500

Professional Security Key Storage

You no longer need to choose between convenience or security with the new KeySafe P500.

We paired our easy to use push button design with a heavy duty, triple wall vault, and long travel clutching lock. We also added 2 more buttons for 4,096 possible code combinations. To provide even more peace of mind, an optional alarm sensor is also available that can be connected to an alarm system for even more security. Your alarm system can then monitor when the KeySafe was opened and closed or set off the alarm if removed from the wall or left open.
