# Pace16PRM

IP and PoE+ over Extended Distance CAT5e Sixteen (16) Port Receiver

Pace16PRM

Description

Altronix Pace16PRM is a long range Ethernet receiver that transmits data at 100mbps full duplex and power via CAT5e or higher cable in a PoE(+) compliant format. Pace16PRM receiver is powered via a PoE midspan, such as the Altronix Netway series, or by an endspan. The receiver passes the PoE(+) compliant power over the cable to the Pace1PTM transceiver which, in turn, passes this power to an enabled IP camera/device. These plug and play units facilitate cost-effective solutions for IP devices that need to be installed at the distances greater than 100m. They also provide a simple way to replace legacy analog products with new IP devices over structured cable.

Key Features

- IEEE 802.3af (15W) and IEEE 802.3at (30W).
