

CEC152 Central Equipment Cabinet (U.L. 1069 Listed)

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The central equipment cabinet(s) shall be Alpha Communications® model **CEC152**. Cabinet(s) shall be surface mounted and shall be used to protect the system amplifier/power supply unit(s). When used with a U.L. listed nurse-call or similar health-care system, cabinet shall be U.L. Listed (1069), to the latest revision. In certain applications, the system transformer(s) may also be housed within the **CEC152** cabinet. Cabinet shall be designed to mount the DIN rail bracket typically supplied with the **AC152** and/or **AC153** control units, as well as to allow space for the optional **BA001** batteries.

Contractor shall install the cabinet in a suitable indoor environment, away from any extremes of temperature, humidity, dirt, noxious gases or fumes, electrical interference, water, vermin, etc.

Contractor shall observe all local and national electrical and building codes.

CEC152 CENTRAL EQUIPMENT CABINET (U.L. 1069 LISTED)

The Alpha Communications® **CEC152** is designed to house and protect system amplifier, power supplies, and transformers from damage due to vandalism, or other job-site conditions. It is also used to protect the system wiring splices and connections from accidental damage by non-authorized personnel.

These equipment cabinets surface mount right onto the wall, and have electrical knock-outs (KO's) on four (sides) for easy tubing connections. A 7 inch (178mm) long welded piano hinge assures positive door cover opening and closing.

The cabinet cover can be secured by two (2) security screws (supplied by the customer). For higher security applications, the **CEC152** cabinets feature a front knockout (KO) for an optional lock (to be supplied by the customer). The **CEC152** is finished in a beige color powder coated painted finish over heavy-duty steel.

When used with a U.L. listed nurse-call or similar health-care system, the **CEC152** is U.L. listed (1069), to the latest revision
