

OH600S / OH601S Series Surface Panel Backbox/Housings

Model OH600S Surface Backbox
Shown in a Vertical Configuration
Can be used horizontally

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The surface back box(es) shall be Alpha Communications® model **OH600S** or **OH601S** or approved equal. They shall be made of steel, and painted in a Black powder coated epoxy finish. All models shall be partially open in the back to allow for wire access and mounting.

Contractor shall observe all local and national electrical and building codes.

OH600S / OH601S SURFACE BACKBOXES

Model OH601S Surface Backbox Shown Right

The Alpha Communications® models **OH600S** and **OH601S** are surface mounting backboxes. They are both made of steel, painted in a Black powder coat epoxy painted finish for durability.

They are among our most popular surface mounting boxes, and are used with a variety of intercom entry lobby panels, and remote intercom stations, to allow them to be surface mounted on the finish of a wall. Typically, wire access is from the large opening in the rear of each box, but the installer can drill or punch knockouts as needed, in the field.

These boxes are finished on top, bottom and both sides, and are partially open in the back to allow for wire access. They have inside mounting holes to allow for mounting right to the finished wall surface.

They are typically used with the **ES612**, **AM612** and **AM642** series lobby entry panel stations, but can be used with other stations as well. The **OH600S** can also be used with the **IR150SS** area of rescue assistance remote station(s), when mounted horizontally.

DIMENSIONS

OH600S (when mounted vertically)	Height: 11.50" (293mm) Width: 5.00" (127mm) Depth: 2.00" (51mm)
OH601S (when mounted vertically)	Height: 18.88" (480mm) Width: 5.00" (127mm) Depth: 2.00" (51mm)
