

AW650blk / S12 Cinema System

The problem with ordinary 5.1 channel audio systems is that they're subject to room dynamics. The sound lacks focus, and it doesn't track the video properly. In a word, they're "ordinary".

Proficient presents the AW650blk / S12 Cinema System, designed for heart-pounding 5.1 performance. It begins with an array of four AW650blk monitors, each with 150 watts of power handling, along with a 6½" coated polypropylene woofer and 1" Supernil soft-dome pivoting tweeter. Then we add the CC525 center channel speaker, a compact 100 watt design featuring two 5¼" graphite woofers, a 3" graphite midrange and 1" aluminum dome tweeter.

Driving the low end is our S12 powered sub with 12" woofer, auto on/off, crossover and level controls, and 250 watts of power handling. It's the sub that others aspire to be.

Listen to the AW650blk / S12 Cinema System. The performance is about to start.

Quality-built, of course. Exactly what you'd expect from a premium brand like Proficient.
