

Introducing PowerPlex 2000

Cost-effective Access Control for Standalone Applications

- Self-Powered: No external power required
- Standalone: No wires to run
- No Batteries Required
- Supports 100 PIN access codes
- Easy to Install: New & Retrofit
- Provides Audit Trail

PowerPlex 2000

PowerPlex is a self-powered, electronic PIN push button lock that uses patented super-capacitor technology in place of batteries or external power sources to power the door lock, making it a cost-effective access control solution for standalone applications.

Features

- Self-Powered: No need for batteries or other power sources as lock generates its own power with every turn of the lever.
- Standalone: No wires to run to or through the door
- No Batteries: The perfect eco-friendly solution for customers adopting environmental sustainability initiatives.
- Lock holds a full charge for up to 70 days with no activity at the door
- PIN access supports 100 unique user codes
- Packaged pre-assembled so PowerPlex is easily installed on any standard interior or exterior door
- Provides an Audit Trail

Applications

PowerPlex is the ideal access control solution for small sites with only 1 or 2 critical doors to be secured; for remote sites that cannot be easily networked to an existing access control system; or as an introductory access control product.

Some possible applications include:

- Small-to-medium size facilities
- Rarely visited remote locations
- Retail "Employees Only" Areas
- Warehouses / Stock Rooms / IT Rooms
- Cash Rooms / Storage / Break Rooms
- Medication Cabinets / Restricted Areas
- Conference Rooms / Managers Offices
- R&D Labs
- High Voltage / Cell Towers / Substations
