## Instruction Guide

▲ Fixed Lens

▲ Flat Pinhole Lens

▲ Conical Pinhole Lens

▲ Varifocal Fixed Iris Lens

### ■ Features

#### High Resolution color for crisp, clear video

- 690TVL Effective

#### Wide Dynamic Range (WDR)

The camera delivers clear, high quality pictures even in backlight, by increasing exposure in dark areas while decreasing it in bright areas; a corrected image with clear details results.

- 120dB maximum dynamic range

#### DNR (Digital Noise Reduction)

The amount of low illuminance noise has been significantly reduced, and the signal-to-noise ratio (S/N ratio) as well as horizontal resolution, have been improved resulting in a clear and sharp image even in low light.

#### Day & Night

The camera identifies whether it is day or night and automatically switches to the appropriate mode, depending on its environment. By day, the camera switches to color mode in order to maintain optimal color. At night, it switches to B/W mode so as to obtain better picture definition.

#### High Sensitivity for low-light images

The built-in high sensitivity PIXIM SEAWOLF Sensor enables a clear image even at 0.1Lux

#### Motion Detection

Since the camera detects motion without any additional external sensor, you can monitor activity more efficient.

#### Programmable GAMMA Processing

#### OSD Control by coaxial cable via pelco coaxitron

#### Controlled by OSD Menu

The camera can be controlled by selecting text displayed on the monitor screen.

#### Additional Functions

SYNC (INT/L), SENS-UP, FREEZE, FLIP (HV-REV), D-ZOOM, SHARPNESS and PRIVACY functions are provided.
