

TRANSFORMING SPACES WHERE PEOPLE LIVE & WORK

Legrand is the global specialist in electrical and digital building infrastructures. Its comprehensive offering of solutions for commercial, industrial and residential markets makes it a benchmark for customers worldwide. In the AV space, Legrand offers an extended portfolio of branded audiovisual products including flat panel mounting solutions, projector mounts, projection screens, equipment racks, PTZ cameras and furniture for AV markets. Its innovative products are sold under the Chief, Da-Lite, Middle Atlantic, Projecta, Vaddio and Sanus brand names. All brands work together to provide a breadth of product, strength of longevity, and advantage of superior customer service and support.

Chief focuses on commercial AV flat panel and projector mounts. Home Theater, Workstation and Custom Display Solutions are also part of the Chief product offering. Known in the industry for high quality mounts with both Custom and Universal options, as well as an extensive accessories line, Chief is focused on professional installers worldwide.

For over 100 years, Da-Lite has been designing, manufacturing and marketing the most comprehensive line of projection screens in the world. Today, we offer our widest selection ever of proprietary projection screen surfaces and materials in our history.

Projecta is Europe's leading manufacturer of high quality projection screens. We design, develop and build an extensive range of projection screens in the largest projection screen manufacturing facility in Europe, located in Weert, the Netherlands. Founded in 1952, we have 60 years of experience, and over time we have grown to become your trusted source for projection screen solutions.

Vaddio manufactures professional quality PTZ cameras, Pro AV solutions and a full suite of Unified Communication and Collaboration systems. Combining enterprise class performance and industry leading support, Vaddio products enhance any AV experience by elevating the science of communication.

THIS IS VADDIO

The Art of Easy Innovation in Communication

Vaddio designs, develops and manufactures professional quality audio video solutions for live production, lecture capture and collaboration applications.

Delivering end-to-end solutions, including Pan-Tilt-Zoom (PTZ) cameras, camera extension systems, mounts, camera controllers and switchers, as well as unified communications and collaboration systems, Vaddio provides enterprise-class performance and industry-leading support with systems designed for simplicity of installation and operation.

Vaddio products enhance any audio visual experience by elevating the science of communication with "The Art of Easy."

USB COLLABORATION SOLUTIONS

Vaddio's line of USB products lets you transform your personal computer into an effective and affordable enterprise-class room system. Whether it's a small videoconferencing system or distance learning, Vaddio gives you the tools you need to make your software applications work in a real world AV environment.

Vaddio's Unified Communication and Collaboration tools include HD-USB cameras, a full suite of USB audio components and USB systems for plug-and-play simplicity. All of Vaddio's Unified Communication and Collaboration tools are based on Universal Video and Audio Class (UVC/UAC) standards, eliminating the need for custom software drivers or a particular OS to be installed on the PC, allowing them to work seamlessly with any soft client conferencing system including Skype for Business, Google Hangouts, Cisco WebEx and any lecture capture software such as Tegrity, Panopto, Kaltura, Cattura and Mediasite.

Vaddio's Unified Communication and Collaboration tools truly bridge the gap from PC applications to professional AV solutions that allow users the opportunity to engage in any type of collaboration and conference activity across the enterprise.

USB Room Solutions

Enterprise-class USB collaboration tools designed for plug-and-play simplicity.

ConferenceSHOT FX Fixed USB Camera

Enterprise-Class Video Conferencing Camera Provides Professional Quality at Entry-Level Price

Designed especially for huddle spaces and small meeting rooms, the ConferenceSHOT™ FX has an extra-wide 88-degree field of view to capture everyone in the meeting room. Its USB 3.0 output sends uncompressed, high resolution video over USB and is capable of 1080p/60fps for the smoothest video available.

ConferenceSHOT FX has an intuitive web-based user interface for remote configuration, management, and control. Its offers a 3x optical zoom with configurable presets and manual pan/tilt operation. Users can automatically or manually adjust image color, shading, backlight, and wide dynamic range to optimize color for different settings.

ConferenceSHOT™ AV Enterprise Class Conferencing System

Optimized video and audio performance for small to medium meeting spaces

With sharp video and powerful sound, ConferenceSHOT AV brings video conferencing to a new level. ConferenceSHOT AV is a 10x zoom PTZ camera with audio inputs and outputs that let you connect a speaker and two Vaddio microphone pods. It's a significant step up in performance from the current webcam-based technology offerings.

- Turns your BYOD device into a small space UC system
- Professional PTZ camera quality and full room audio performance.
- USB-based solution
- Makes it easy to collaborate using Skype for Business, WebEx, Zoom, BlueJeans, Google Hangouts, GoToMeeting and other leading UC services
- Offers enterprise-class remote management and IP stream functionality for administrators

ConferenceSHOT AV – Bundles

ConferenceSHOT AV is available in a variety of bundles. All bundles provide:

- USB 3.0 connection to access leading web services including Skype For Business, Zoom, WebEx, Google Hangouts, BlueJeans and others
- USB 3.0 connection delivers uncompressed video from leading UC solutions, for the most natural, high quality experience
- High-quality acoustic echo cancellation (AEC) audio for clear conversations
- Bundles available in white or black/silver

ConferenceSHOT AV Bundle – Huddle

Ideal for Small Conference Spaces

- Includes ConferenceSHOT AV, ConferenceSHOT Speaker and EasyMIC Table MicPOD
- HD PTZ Camera with 10x zoom, 74° Wide Field of View supporting up to 1080p/60 resolution
- Table MicPOD with 360° coverage and independent echo cancellation and equalization
- Powered speaker (20W) with integrated performance and installation with ConferenceSHOT AV

AV BRIDGES

The AV Bridge family from Vaddio marries professional AV quality with the power of PC applications to create an exceptional audio-visual communication experience.

AV Bridge products make it simple to encode, capture, and stream your AV content from cameras and audio through a variety of PC applications such as Skype for Business, WebEx, Google Hangouts, or Zoom. Field tested and proven – AV Bridge is the industry standard for converting AV equipment to USB streams.

AV Bridge MatrixMIX Multipurpose AV Switcher Stream Your Live Events to UC Applications

Stream, elevate and orchestrate video content for anything from presentations to live events to UCC applications – with industry-leading simplicity and technology.

Together with Vaddio's PCC MatrixMIX Controller (999-5755-000), and TeleTouch 27 USB Touch-Screen Multiviewer (999-80000-027), plus Vaddio cameras, audio devices and trigger sensors, you can create customized solutions for a host of applications.

- Works in multiple applications – live production, automated presentation and unified conferencing and collaboration
- Multi-functional feature set – combines switching, advanced camera control, streaming and graphics mixing capabilities
- Enhance live events with seamless switching of cameras and media content
- Easy to use – create a first-rate production without extensive training
- 8x2 video mixer that also provides multiviewer output
- 11x7 audio mixer supports analog, HDMI, USB and IP audio channels
- Embedded RTSP IP and USB 3.0 output streaming
- Two graphic keying layers per output channel for overlay graphics or motion graphics over live video feed

Product	North America	International
AV Bridge MatrixMIX Multipurpose AV Switcher	999-5660-000	999-5660-001

Create customized solutions with the TeleTouch 27 USB Touch-Screen Multiview and the PCC MatrixMix Camera Controller. For details, see pages 42 and 43.

AV Bridge MATRIX PRO

The technology in AV Bridge MATRIX PRO bridges the gap between PC applications and AV equipment. Now you can connect multiple cameras, microphones, displays and control, mix, switch and capture all from a single device. Users retain all the capabilities of a traditional conference room with the added capability of USB conferencing and IP streaming. Now improved with larger resolution, better image quality – 1080p/60.

Why have a full rack of gear when one device can do it all?

- All-in-one AV room solution
- AV Switcher with simultaneous USB and IP streaming
- Simplified camera switching capabilities
- Four input video switcher
- Three built-in Quick-Connect camera extensions
- 8x4 audio matrix
- Four mic/line inputs with individual echo cancellation channels
- Four EasyMic ports for use with EasyUSB MicPOD devices
- Easy, intuitive web-based user interface for programming, control and management
- USB joystick camera control through the web interface

Compatible with:

- RoboSHOT 12 AVBMP (999-9900-500), RoboSHOT 30 AVBMP (999-9910-500) and ZoomSHOT AVBMP (999-6920-000)
- EasyMic Table MicPOD with Keypad (Black 999-8500-000 or White 999-8500-000W)
- EasyMic Ceiling MicPOD (Black 999-8515-000 or White 999-8510-000)

PROFESSIONAL CAMERAS

From conference rooms to auditoriums and everything in between, Vaddio has a professional high-definition camera solution that hits your target with world class precision. Offering a distinct lineup of PTZ and fixed point-of-view cameras, we carry the most complete camera line for AV applications on the market today.

Vaddio's flagship RoboSHOT® PTZ cameras provide pristine image quality and color reproduction, with unsurpassed flexibility for integration and control. The RoboSHOT PTZ family includes both direct video output cameras and those with integrated camera extension systems.

Expanding the leadership in PTZ cameras with extensions, Vaddio has introduced OneLINK™ systems. Engineered for simplicity, the OneLINK HDMI camera extension system uses a single Cat-5e/6 cable to stretch power, video and control up to 100 meters, adding utility while easing integration and reducing installation cost. The OneLINK Bridge AV Interface combines a camera extension system with an audio mixer, creating a USB bridge that connects professional AV sources to PCs – all in a single device. It lets end users convert an audio/video source from any PTZ camera or AV switcher into a USB 3.0 media stream and easily use applications like Skype for Business, Google Hangouts, WebEx and Zoom.

Vaddio brings unprecedented capabilities and performance for an amazing AV experience.

Cameras

Vaddio's professional cameras are easy to install, easy to use and are backed by the industry's highest level of customer service. Flexible, scalable, incredible.

PTZ Direct Output Cameras

RoboSHOT 20 UHD

Premium Video. Exceptional Price.

Combining 4K video technology with the Art of Easy, the RoboSHOT 20 UHD PTZ direct output camera delivers extraordinary resolution, superb color reproduction and unmatched price performance.

RoboSHOT 20 UHD delivers Ultra HD (4K) video with pristine color reproduction even in challenging lighting conditions, and delivers exceptional HD (2160p/30) video compared to 3-chip PTZ cameras, at a better price. With native HDBaseT™ connectivity for cable extension over single Cat-5e, and simultaneous HDBaseT, HDMI, 3G-SDI and IP streaming outputs, RoboSHOT 20 UHD introduces a whole new class of camera quality, performance and manageability.

- Ideal for medium spaces
- All-in-one professional class, UHD (4K) PTZ camera with 20x zoom
- Pristine image quality – comparable to 3-chip cameras in 1080p operations
- Flexible I/O - HDBaseT, IP (H.264) HD streaming, 3G-SDI output, HDMI output
- Exceptional low light performance
- Expansive IP management and control capabilities

Camera Extensions

Camera installation just got easier! Vaddio's camera interfaces extend video, power and control over Cat 5e/6 cables up to 100 meters.

OneLINK Bridge AV Interface

Extend it. Bridge it. Stream it.

OneLINK Bridge AV Interface combines a camera extension system with an audio mixer to provide USB bridging functionality - making it easy to convert an audio and video source into a USB 3.0 media stream so you can use it with popular cloud conferencing solutions like Skype for Business, Google Hangouts, WebEx and Zoom.

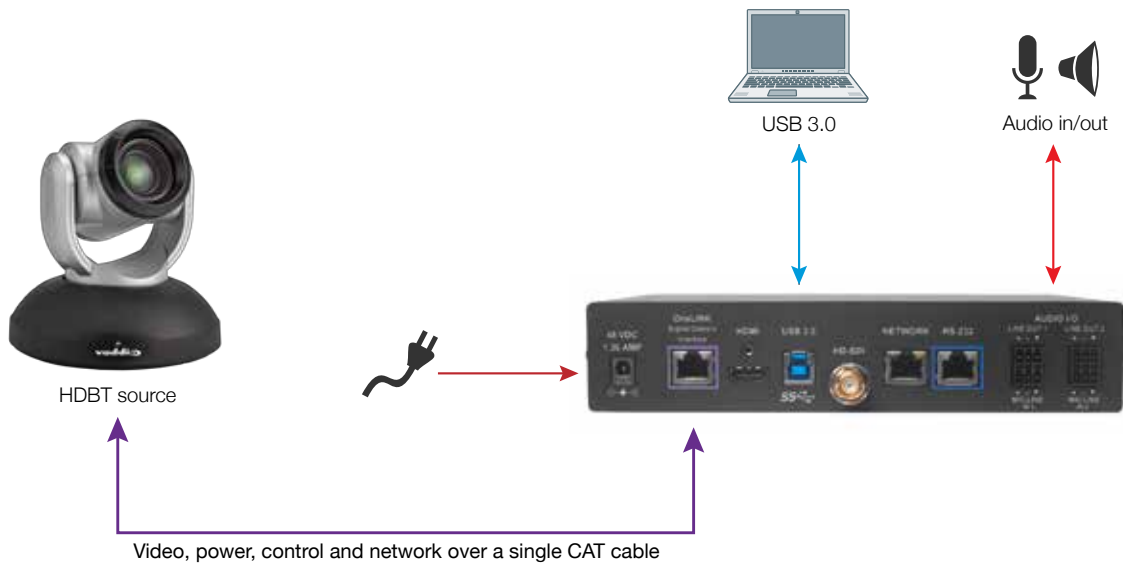

- Uses HDBaseT technology to extend video, power, control, and network up to 100 meters (328 ft) over a single Cat-5e/6 cable
- USB output up to 1080p/60 video resolutions
- Full audio mixer built-in with acoustic echo cancellation (AEC)
- Browser-based user interface for control and remote management
- Available in a variety of configurations for RoboSHOT and third party cameras, or as a standalone receiver that can be connected to compatible HDBaseT AV switchers

Turn your AV system into a USB media stream

- Works with compatible RoboSHOT Cameras and third-party PTZ cameras (Cisco, Polycom, Sony, Panasonic) and compatible HDBaseT A/V switchers
- Pair it with any HDMI source (with EZIM)
- Use it as a stand-alone HDBT receiver to get USB 3.0 (video and audio) to table from HDBaseT AV switchers such as Crestron, AMX and Kramer
- Simple, clutter-free installation – power, control, video and streaming over a single Cat-5e or better cable

Flexible design for multiple applications

- Unified communication and collaboration
- Presentation switcher USB bridge
- Video conferencing USB bridge

The OneLINK Bridge AV Interface incorporates Vaddio's market-leading AV Bridge functionality, integrating pro AV sources into your PC via USB 3.0 media stream delivery.

OneLINK Codec Kits For Cisco and Polycom Codecs

More Choices for Room Design and Installation

Tailored for Cisco® and Polycom® Codec Systems, OneLINK™ Codec Kits enhance capabilities of close-ended hard codecs – allowing you to extend power, video and control up to 328 feet (100 meters). OneLINK Codec Kits also give you the freedom of camera choice by providing the option to connect Cisco, Polycom, or Vaddio® cameras to codec rooms.

End users enjoy the added flexibility of connecting to any cloud conferencing software with Vaddio’s OneLINK Bridge Codec Kits. In addition, Vaddio OneLINK extensions & cameras are now compatible with the popular Cisco TelePresence® SX20 Codec.

Features

- HDBaseT interface extends video, power, control and network over a single Cat-6 cable up to 328 ft (100 m)
- More flexibility in camera and/or codec placement
- Camera interoperability – RoboSHOT cameras can now be used with Polycom or Cisco codecs, providing more choices including 12x, 20x and 30x optical zoom
- Deliver uncompressed, high definition cloud conferencing with USB 3.0 available on OneLINK Bridge Codec Kits
- Intuitive browser-based user interface for camera control and remote management
- Crestron, AMX and Extron control API
- Plug and play usability
- OneLINK Codec Kits include: OneLINK extension system, EZIM (not needed with Vaddio HDBT kits), cables*, and camera mount (in third-party camera kits)

** Please note: When connecting any Cisco codec to a Cisco Precision 40 or PrecisionHD 1080p2.5x camera, you will need to provide a Cisco CAB-PHD4XS2-SPLIT cable. When connecting a Cisco SX20 codec to any camera (either Cisco or Vaddio), you will need to provide the same Cisco CAB-PHD4XS2-SPLIT cable.*

CONTROL & SWITCHERS

Vaddio's Precision Camera Controllers (PCC) take your video production solution to the next level. Combining a precision hall-effect joystick with integrated control for preset operations and image control for Vaddio®, Sony® and Panasonic® PTZ cameras, the PCC family meets the most demanding camera control applications.

Centralize your campus camera control center with the PCC Premier. It raises the bar in IP camera control when paired with RoboSHOT® PTZ cameras. The PCC Premier incorporates a H.264 decoder virtualizing camera control over an IP network for remote operating centers. You can view RoboSHOT IP video streams directly from the controller.

RoboTRAK™ expands Vaddio's technology leadership in automated presenter tracking systems. Based on an IR tracking algorithm, an instructor simply wears a lanyard and the RoboTRAK follows the instructor. Pair with any RoboSHOT camera and the RoboTRAK sends its pan/tilt info to create production worthy video – all without an operator. Optimized for large venue classrooms, RoboTRAK makes intelligent tracking easy.

ProductionView™ products combine camera control, video switching and graphics into an all-in-one live production system. They're designed for operators of all skill levels to switch effortlessly among multiple cameras, capturing every aspect of an event. Connect a TeleTouch™ touch screen to the multiviewer output of the ProductionView for an intuitive user interface that any volunteer can run by touching the live video feed on the screen. Pair ProductionVIEW with RoboSHOT PTZ cameras to complete the production solution. ProductionView is offered in either 3G-SDI or analog versions.

Completing Vaddio's controls solutions are the StepView™, AutoView™ and PresenterPod™ products. These trigger-based systems run camera presets by pushing a button, stepping on a mat, or simply by walking under a sensor.

Tracking System

Ideal for classrooms or training rooms, Vaddio tracking systems let instructors focus on teaching, not technology.

RoboTRAK™ Presenter Tracking System

RoboTRAK is an IR lanyard-based camera tracking system designed to provide a smooth and accurate panning and tilting motion that follows the instructor as they walk around the presentation area of a classroom.

System Includes:

- RoboTRAK IR Camera
- IR Lanyard with 40 hour battery life
- USB Charger and cable for IR Lanyard
- RoboTRAK Double Decker Wall Mount and Hardware
- One Microsemi PoE+ Midspan power injector and IEEE802.3at Splitter
- Cables Power and Cat-5e patch

Important Note:

RoboSHOT Video Camera is not included with the system. RoboTRAK is compatible with all stand-alone RoboSHOT series cameras.
