COMELIT PAC®

COMMERCIAL INTERCOM & ACCESS CONTROL KIT

Our Comelit PAC simple commercial system is the solution for you. We have integrated our video intercom and access control systems into one. With a video intercom, users can recognize visitors calling at the main entrance before granting them access through a simple app on your smart device. Employees and visitors are issued key fobs for quick access. These products work together to ensure safety and convenience for both the user and visitor.
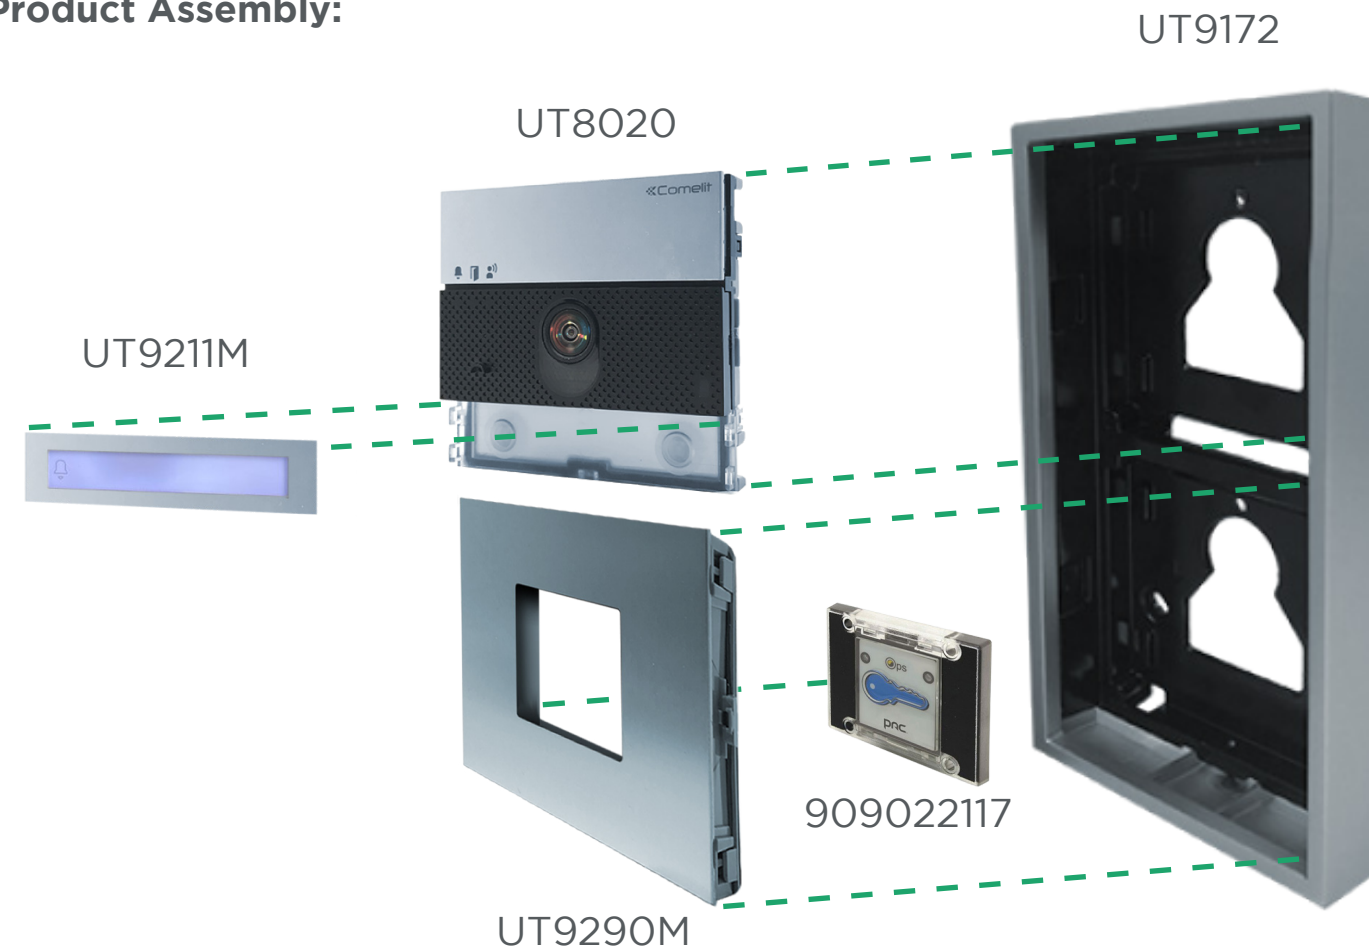

Video Intercom Parts

1x UT8020 - Ultra IP Audio/Video Module
