

Eaton 9PX 5500VA 4900W 120V/208V Online Double-Conversion UPS - L14-30P, 6x 5-20R, 1 L6-30R, 1 L14-30R, Hardwired Outlets, Cybersecure Network Card, Extended Run, 4U

MODEL NUMBER: 9PX6KSP

Provides sine wave output, complete battery backup and power protection for mission-critical IT installations, edge networks and other advanced network applications.

Features

5.5kVA/4.9kW Battery Backup for IT Installations and Edge Networks

This 9PX split-phase online double-conversion UPS system delivers both 120V and 208V output without the expense or extra weight of a bulky transformer or distribution module. The 9PX6KSP fits into just 4U of rack space and provides reliable battery backup and AC power protection against blackouts, brownouts, surges and line noise that can damage valuable IT equipment or destroy data. The 9PX6KSP is superlative power management for education, commercial, financial or healthcare networking components, including Cisco switches and servers.

Expandable Internal Battery Backup Keeps You Operational Through Power Outages

The field-replaceable, hot-swappable valve regulated lead acid (VRLA) battery modules allow you to work through short power failures and give you enough time to safely save files and shut down your system in case of a prolonged blackout. Exclusive ABM technology increases battery life by 50 percent and closely monitors battery health to provide advanced notice when batteries need replacing. You can also connect up to four extended battery modules (9PXEBM240SP, sold separately) for hours of extended runtime.

Included Gigabit Network Interface Offers 24/7 Remote Access

The NETWORK-M2 Gigabit network card enables full remote configuration and management, including load shedding, reboots of connected equipment and safe shutdowns. UPS firmware can also be flashed remotely through the NETWORK-M2 without dropping the load, so you don't have to plan for downtime. The card meets both UL 2900-1 and IEC 62443-4-2 standards for cybersecurity, which were developed to address the vulnerability of connected devices to known malware/exploits and to protect business from these risks. The optional Environmental Monitoring Probe Gen 2 (EMPDT1H1C2, sold separately) provides a variety of environmental monitoring capabilities, including temperature and humidity conditions.

NEMA Outlets Protect Your Connected Components

Six 5-20R, one L6-30R and one L14-30R managed outlets provide connected equipment with pure sine wave AC output and allow you to monitor power consumption down to the outlet group level. Power provided by these outlets is filtered to protect connected equipment against damaging surges and line noise. The 5-20R outlets are split evenly into two banks that let you shed non-critical loads to extend runtime for critical loads. The 9PX6KSP also supports hardwired output.

Highlights

- Keeps equipment running during outages to allow time for file saves and safe shutdown
- Included NETWORK-M2 Gigabit network card enables full remote access and control
- Exclusive ABM technology with 3-stage charging increases internal battery life by 50%
- Interactive LCD interface keeps you updated on critical load information in real time
- Optional extended battery modules allow extended runtime to keep equipment powered

Package Includes

- 5500VA 4900W 120V/208V 9PX Split-Phase Online Double-Conversion UPS with 8 Outlets
- NETWORK-M2 Gigabit network card
- (2) Internal battery modules
- USB cable
- RS-232 cable
- Tower support stands
- Cable gland for hardwire connection
- Phillips-head screwdriver
- Rack-mounting hardware
- Owner's manual

Rotating LCD Interface Keeps You Informed at a Glance

The intuitive front-panel LCD provides control settings and critical information to help diagnose any issues. The interface rotates to accommodate both rack-mount and tower configurations, and it tilts up to 45 degrees for more comfortable viewing.

Advanced Communications Ports Allow for Automatic Saves and Shutdowns

RS-232 and USB ports connect to a serial-enabled device for a variety of communication options (cables are included). A dry-contact relay port can be programmed through the LCD to provide reliable communications to automation and industrial components. The RPO/ROO connectors permit emergency shutdown or remote restart of all connected equipment.

Versatile Installation Options

You can mount the split-phase 9PX6KSP in just 4U of space in an EIA-standard 19-inch rack using the included 4-post rail kit. You can also adapt it for tower installation using the included support stands. The six-foot power cord with NEMA L14-30P plug connects to a compatible AC outlet. A cable gland and Phillips screwdriver are included for alternate hardwire input.
